Latest SAP C-SACP-2114 Certification Practice Test Questions

NO.39 What master data can you update during the import of transaction data into an SAP Analytics Cloud planning model with private and public dimensions?

- * Hierarchies for public dimensions
- * Property values for private dimensions
- * Property values for public dimensions

NO.40 You are using SAP BPC, version for SAP BW/4HANA Standard option. When you create a planning model based on an SAP BPC model, what can you do in SAP Analytics Cloud? Note: There are 2 correct Answers to this question.

- * Create planning sequences.
- * Create data actions.
- * Create public dimensions.
- * Create data manager packages.

NO.41 You have a New Model that only contains local currency values. When the New Model is used in stories, you need model-configured group currency values that are not stored in the database. What type of measure would you include in the New Model to meet the requirement?

- * Converted
- * Calculated
- * Restricted

NO.42 You have a planning model with the following dimensions: account, product, profit center, date, and version. In a story, which new master data can you add on the fly? Note: There are 2 correct Answers to this question.

- * Product member
- * Hierarchy node
- * Profit center property value
- * Account member

NO.43 Your account dimension has an account for Profit that is calculated as [Revenue] – [Cost]. Which formula can you use to enter a value for Profit and have the system re-calculate Cost while Revenue remains constant?

- * [Revenue] – [Cost] := INVERSE ([Cost] = [Revenue] – [Profit])
- * [Revenue] – [Cost] | INVERSE ([Cost] := [Revenue] – [Profit])
- * [Revenue] – [Cost] | INVERSE ([Cost] = [Revenue] – [Profit])

NO.44 In a story, how can you create a chart to compare versions? Note: There are 2 correct Answers to this question.

- * Add a recommended comparison.
- * Add a ‘difference from’ measure.
- * Add a new member with a formula.
- * Add a chart component.

NO.45 You have a planning model with the following dimensions: Cost Center. Account. Date. Entity. Version.

When you add new transactional data to your model, you want to overwrite any records with cost center A and add new data for cost center B.

Which import method do you use?

- * Update
- * Append
- * Overwrite
- * Merge

NO.46 Why would you decide to use an Analytic Application instead of a Story? Note: There are 2 correct Answers to this question.

- * To have fewer data action triggers
- * To do form-based data input
- * To use advanced data actions
- * To use data cell comments

NO.47 What can you do with live connections in SAP Analytics Cloud? Note: There are 2 correct Answers to this question.

- * Export data.
- * Reduce data redundancy.
- * Secure data with on-premise system security.
- * Secure data with SAP Analytics Cloud security.

NO.48 You imported a transaction data file into an empty model with the results as shown in Figure A.

Later, a member of the finance team wants you to import a new data file. In the new data file, you find the following differences: The value of the Labor account has increased to 1600. There is a new record for the Services account, with a value of 250. The record for the Travel account has been deleted. To achieve the result shown in Figure B, which option must you use to update the data?

Fig. A

Data Foundation				Version: Actual
Total Number of Results: 6				
Account	Date	Currency	P000_CostCenter	Values
Benefits	202001	USD		250
Labor	202001	USD	HR	1500
Travel	202001	USD	HR	500

Fig. B

Total Number of Results: 7				
Account	Date	Currency	P000_CostCenter	Values
Benefits	202001	USD		250
Labor	202001	USD	HR	1600
Services	202001	USD	HR	250
Travel	202001	USD	HR	500

- * Update
- * Clean and replace selected version data
- * Append: Reject duplicated rows in model
- * Clean and replace subset of data with Scope = Version and Account

NO.49 When you import group reporting data from SAP S/4HANA to an SAP Analytics Cloud planning model, which mappings are required? Note: There are 2 correct Answers to this question.

- * Financial statement item to an SAP Analytics Cloud account
- * Company to an SAP Analytics Cloud entity
- * Consolidation unit to an SAP Analytics Cloud entity
- * General ledger account to an SAP Analytics Cloud account

NO.50 When you import account hierarchy data from SAP S/4HANA, which of the following account types are determined by semantic tags exclusively? Note: There are 2 correct Answers to this question.

- * EXP
- * INC
- * AST
- * LEQ

NO.51 In a rolling forecast table, what can be used to determine the date to cut over to plan data?

- * Last actual value
- * Look back x number of months
- * Look ahead x number of months
- * Current date with an offset

NO.52 What dimension types can be used to determine currencies? Note: There are 2 correct Answers to this question.

- * Organization

- * Date
- * Account
- * Generic

NO.53 Why would you use the SAP Analytics Cloud add-in for Microsoft Office instead of SAP Analysis, Edition for Microsoft Office? Note: There are 2 correct Answers to this question.

- * To swap axes
- * To highlight changed cells
- * To create versions
- * To connect to any device

NO.54 In SAP Analytics Cloud, where can users access data locking tasks?

- * Input controls
- * Security
- * Calendar
- * Planning stories

NO.55 You are using SAP Analytics Cloud and SAP BPC, version for SAP BW/4HANA Embedded option. Which of the following planning features are available for hybrid planning? Note: There are 2 correct Answers to this question.

- * Analysis authorizations
- * Data actions
- * Data access controls
- * Planning sequences

NO.56 You are using mass data entry mode. After you enter new transaction data, what can you do with the data?

- * Process
- * Publish
- * Lock
- * Revert

NO.57 When exporting from SAP Analytics Cloud to SAP Business Warehouse, which of the following are active by default? Note: There are 2 correct Answers to this question.

- * Update fiscal period
- * Overwrite mode
- * Update calendar month
- * Delta mode
