Free UiPath-RPAv1 Exam Braindumps - New 2022 UiPath Practice Exam
Practice Test for UiPath-RPAv1 Certification Real 2022 Mock Exam

How to study the UiPath UiPath-RPAv1: UiPath RPA Associate v1.0 Exam (UiRPA)

There are several resources for the certification test UiPath-RPAv1. One of the participants that may be referred to is study manuals and books that employ precise and appropriate material to improve understanding. Another source that may be considered by participants is video tutorials and lectures that might somewhat alleviate the agony of the study and are significantly less dull on the part of some applicants. Smart candidates wishing to build a sound foundation in all examination subjects and related technologies usually combine visual presentations with study guides in order to reap the benefits of both subjects. **UiPath-RPAv1 practice exams** are designed to get pupils familiar with the actual examination situation. Statistics demonstrate that most students fail to be afraid of the unknown, not because of this preparedness but because of examination dread. The ValidBraindumps expert team recommends that you prepare some notes on these topics, and you do not forget to practice our **UiPath-RPAv1 exam dumps**, both of which will help you to clear the examination well.

Who should take the UiPath UiPath-RPAv1: UiPath RPA Associate v1.0 Exam (UiRPA)

The UiPath Certified UiPath Advanced RPA (UiRPA) certification **UiPath-RPAv1 exam test** is a globally recognised verification certification which recognises individuals with UiPath Certified Advanced RPA Developer (UiRPA) qualifications. There is no such

criterion for this examination that one of the following is still good:

- Technically skilled and knowledgeable to work alone- Advanced formal training with substantial experience preferably accomplished at advanced level- 6+ months of experience as an RPA developer **Q70**. Which Queue Item properties can be used to control the order in which the items are processed?

Options are :

- * ItemInformation
- * Priority
- * Postpone
- * Deadline

Q71. What are the uses of Web Scrapping in UiPath?

Options are :

- * Extracting lists or other structured data from a web page
- * Extracting all the information from a web page
- * Extracting the images from a web page
- * Extracting the content of a table from a web page

Q72. What is UiExplorer used for?

Options are :

- * To view logs
- * To create stable selector
- * To explore workflow tree

Q73. How can a process be executed on three different robots?

Options are :

- * By deploying the process in the environment of the robots, which run it automatically
- * By creating a job and selecting all three robots
- * By scheduling the process and adjusting the settings in the Execution Target tab accordingly
- * It is not possible to allocate a process to three different robots

Q74. Which activity is used to loop through a collection of items?

Options are :

- * Assign activity
- * If activity
- * Flow decision activity
- * For each activity

Q75. You want to build a Dispatcher process to populate an Orchestrator Queue for parallel processing on multiple robots. Which activity should you use to add a queue item for each work item?

Options are :

- * Add Transaction Item
- * Add Queue Item
- * Get Transaction Item

Q76. What activities can you use to send an email message?

Options are :

- * Send Outlook mail message
- * Send SMTP mail message
- * Send IMAP mail message

Q77. Add Assets in Orchestrator has the following option:

Options are :

- * Value Per Process
- * Single Value
- * Value Per Robot
- * Value Per Environment

Q78. How can you trigger another workflow from within your current one?

Options are :

- * 1. You cannot trigger another workflow
- * By using the invoke method activity
- * By using the invoke workflow file activity
- * By using the open application activity

Q79. What happens in the Init state of the Main workflow, in the UiPath Robotic Enterprise Framework template?

Options are :

- * The robot checks if the previous transaction is complete and then starts the next one
- * The transaction items are extracted from the Queue
- * The robot reads the configuration file and initializes all the required applications

Q80. Which activities can be used to interact with the user?

Options are :

- * Writeline
- * Messagebox
- * Input Dialog

Q81. In the UiPath Robotic Enterprise Framework template, what should be the outcome of the Process Transaction state of the Main workflow when the application loops back to the Get Transaction Item state?

Options are :

- * Business rule exception
- * Application exception
- * Success

Q82. Which is the best way to delete un-referenced variables?

Options are :

- * The unreferenced variables do not utilise memory, therefore you do not have to delete them
- * You can manage your variables from the Design panel>Manage Variables>Remove Unreferenced

* Delete them one by one from the Variables panel. UiPath Studio performs the workflow validation in real time, therefore you can see which variable is being used

Q83. Which of the following technologies can be used for background automation?

Options are :

- * The Full Text method of Screen Scraping
- * Type into activity with Send Window Messages flag checked
- * Data scraping
- * The Click activity with the Simulate Click flag checked

Q84. How can you rename a file using StudioX?

Options are :

- * You cannot rename a file with StudioX
- * Using the Change File action
- * Using the Move File action
- * Using the Rename file action
