

## [Q135-Q154 Get Special Discount Offer on H12-311\_V3.0 Dumps PDF [UPDATED Aug-2022]

Get Special Discount Offer on H12-311\_V3.0 Dumps PDF [UPDATED Aug-2022]  
PDF Download Huawei Test To Gain Brilliance Result!

**NO.135** In order to facilitate management and maintenance, AP The power supply mode is generally preferred to select ( ) for power supply.

- \* Independent power adapter
- \* POE switch
- \* POE adapter
- \* AC power supply

**NO.136** To the following WLAN In the description of the network diagram, the error is ( ).

- \* The picture shows the bypass networking
- \* Can be configured and managed on the access switch VLAN of PVIDA.
- \* can use AC As DHCP Server ,give AP distribute IP address
- \* You cannot use the aggregation switch to STA distribute IP address

**NO.137** The gain of the antenna can be explained ( ).

- \* Antenna's ability to amplify high-frequency electrical signals
- \* The antenna's ability to collect or emit electromagnetic waves in a certain direction is strong or weak
- \* Ability to amplify electromagnetic waves
- \* The antenna's ability to collect or emit electromagnetic waves in all directions is strong or weak

**NO.138** when AC Only one interface is connected to the aggregation layer switch, and the user traffic is directly out of the public network through the aggregation layer switch, and the networking mode that does not flow through should be (). AC At this time

- \* Bypass mode + tunnel forwarding
- \* Bypass mode + direct forwarding
- \* Direct connection mode + tunnel forwarding
- \* Direct connection mode + direct forwarding

**NO.139** Which of the following options are the basic functions of configuring Huawei wireless controllers ()? (Select 3 Answers)

- \* Configuration AC-ID
- \* Configuration Radio template
- \* Configuration AC Country code
- \* Configuration AC of WLAN Source interface

**NO.140** exist WLAN middle ACK What type of frame() does the frame belong to?

- \* Management frame
- \* Control frame
- \* Data Frame
- \* Empty data frame

**NO.141** thin AP In the networking, which of the following authentication methods is not required in the authentication process AC participate().

- \* Shared key authentication
- \* 802.1X Certification
- \* PSK Certification
- \* Portal Certification

**NO.142** The two commonly used units to describe antenna gain are dBi and dBd , The conversion relationship between them is:

$dBi = dBd + 2.14$  .

- \* True
- \* False

**NO.143** 2.4 GHz What is the range of operating frequency specified by China ()?

- \* 2.4 GHz-2.4835 GHz
- \* 2.471 GHz-2.497 GHz
- \* 2.4465 GHz-2.4835 GHz
- \* 2.445 GHz-2.475 GHz

**NO.144** There are three ways to judge Huawei's load balancing: traffic mode, session mode, and virtual switching mode.

- \* True
- \* False

**NO.145** Which is the longest interval between 802.11 frames ()?

- \* SIFS
- \* IFS
- \* DIFS

\* PIFS

**NO.146** In the following description of WEP encryption, the error is ().

- \* WEP encryption uses a stream encryption algorithm
- \* WEP encryption adds IV to destroy the regularity of the key
- \* The length of IV in WEP encryption is 48 bits
- \* WEP encryption allows the device to store four keys at the same time

**NO.147** What are the prerequisites for users to achieve three-tier roaming ()?

(Select 3 Answers)

- \* The two APs that the user roams over must have the same SSID
- \* The two APs for user roaming switching must have the same VLAN
- \* User roaming requires two AP signals to cover overlapping areas
- \* The SSID released by the two APs of the user roaming handover must have the same authentication method

**NO.148** single AP What is the area covered ()?

- \* BSA
- \* ESA
- \* SSA
- \* TSA

**NO.149** Is the following statement about the introduction of frequency planning correct ()?

(Select 2 Answers)

- \* 2.4GHz generally uses 1, 6, 11 three non-overlapping channels for coverage
- \* In China, 5GHz generally has 23 non-overlapping channels available
- \* Microwave interference will occur in the entire 2.4GHz frequency band
- \* If the AP is dual-band, it is recommended to use the 5G priority function

**NO.150** 2.4 GHz What is the frequency band US non-overlapping channel ()?

- \* 2,7,12
- \* 3,8,13
- \* 1,6,11
- \* 3,7,13

**NO.151** Regarding the telnet management of AC6605, the following statement is wrong ().

- \* telnet is a way to remotely manage AC
- \* The telnet service is turned off by default on the AC
- \* telnet service can be configured separately on the wired side and wireless side of AC
- \* telnet can be authenticated based on user name and password, and the transmission is encrypted, so it is quite safe

**NO.152** In China, legally supported WLAN The frequency band has ().

(Select 2 Answers)

- \* 2.4-2.4835GHz
- \* 5.15-5.25GHz
- \* 5.25-5.35GHz
- \* 5.725-5.850GHz

**NO.153** MIMO(Multiple input and multiple output) The client can use at most 3 Two spatial streams transmit data at the same time, and the maximum theoretical rate can reach , That is, multiple input and multiple output, using 600Mbps . 802.11n Technology wireless access point and guest

- \* True
- \* False

**NO.154** What series of Huawei switches () is the Huawei plug-in controller ACU board suitable for?

(Select 3 Answers)

- \* S9300 series switches
- \* S7700 series switches
- \* S9700 series switches
- \* S5700 series switches
