

Ace SCA-C01 Certification with 188 Actual Questions [Q67-Q87]

Ace SCA-C01 Certification with 188 Actual Questions PASS Tableau SCA-C01 EXAM WITH UPDATED DUMPS Q67.

There is a 5MB file size limit on log files that can be sent to Tableau Technical Support. Which of the following are special options that can be used to send large files to Tableau Technical Support? (Select all)

- * Use the Tableau Server REST API to programmatically generate and send the logs
- * Use the Secure File Transfer Site for files 2GB to 10GB in size
- * Use the Customer Portal and upload the file
- * Use the TSM web interface
- * Use the TSM CLI command, tsm maintenance send-logs

Explanation

Link to Tableau Server documentation:

<https://kb.tableau.com/articles/howto/alternative-method-for-sending-large-files>

Q68. Select the INCORRECT statement about the default configuration rule for the following Tableau Server processes:

- * VizQL: Equal to the number of cores divided by four, up to a maximum of four process instances.
- * VizQL: Equal to the number of cores divided by four, up to a maximum of six process instances.
- * Backgrounder: Set to two unless the number of cores is fewer than eight.
- * Data Server: Set to two unless the number of cores is fewer than eight.

Explanation

Link to Tableau Server documentation:

https://help.tableau.com/current/server/en-us/single_server_install_defaults.htm

Q69. In order to archive the outdated logs and force Tableau Desktop to create a new and clean logs folder, which steps must be performed? (Select all the correct options)

- * Keep Tableau Desktop and Tableau Bridge instances open on the computer
- * In the My Tableau Repository folder, rename the current Logs folder to Logs_Backup
- * In the My Tableau Repository folder, delete the current Logs folder
- * Close all Tableau Desktop and Tableau Bridge instances on the computer

Explanation

Link to Tableau Server documentation:

<https://kb.tableau.com/articles/howto/sending-desktop-logs>

Q70. Which of the following statements is correct about Tableau Server's capability to send alerts and email notifications?

- * To send outbound email, you need to configure the Tableau Server mail notification process
- * To send outbound email, Tableau Server must connect to the SMTP server which is a process stored within a Tableau Server deployment
- * To send outbound email, Tableau Server must connect to a separate mail server, known as the SMTP server

Explanation

Link to Tableau Server documentation:

https://help.tableau.com/current/guides/everybody-install-linux/en-us/everybody_admin_monitor.htm

Q71. Which of the following server settings can be customized?

- * Locale only
- * Language only
- * Both language and locale

Explanation

Link to Tableau Server documentation: https://help.tableau.com/current/server/en-us/maintenance_set.htm

Q72. Prior to sending Tableau Desktop log files to Tableau Technical Support, an essential first step is to create clean logs. Which option below best describes the correct course of action for this initial step?

- * In the My Tableau Repository folder, delete the current Logs folder to create a clean slate and save space
- * In the My Tableau Repository folder, rename the current Logs folder to Logs_Backup. This effectively archives the outdated logs and will force Tableau Desktop to create a new and clean Logs folder
- * In the My Tableau Repository folder, transfer the current Logs folder to another temporary location in your local machine

Explanation

Link to Tableau Server documentation:

<https://kb.tableau.com/articles/howto/sending-desktop-logs>

Q73. Which tsm configuration set option controls whether Tableau Server collects historical user activity and other information in the repository?

- * lineage.enabled
- * auditing.enabled

- * lineage.activated
- * auditing.activated

Explanation

Link to Tableau Server documentation:

https://help.tableau.com/current/server/en-us/adminview_postgres.htm

Q74. Which of the following configurations represent the MINIMUM HARDWARE REQUIREMENTS for Tableau Server (CPU, RAM, Free Disk Space)?

- * CPU:4-core, RAM:32GB, Free Disk Space:15GB
- * CPU:8-core, RAM:32GB, Free Disk Space:15GB
- * CPU:4-core, RAM:16GB, Free Disk Space:15GB
- * CPU:8-core, RAM:64GB, Free Disk Space:15GB

Explanation

Link to Tableau Server documentation:

https://help.tableau.com/current/server/en-us/server_hardware_min.htm

Q75. True or False: The status page displayed in both the Tableau Server web UI and the TSM web UI show ALL of the processes on a given node, and lists the same exact Tableau Server processes when you run the TSM CLI command `tsm status -v`

- * FALSE
- * TRUE

Explanation

Link to Tableau Server documentation:

https://help.tableau.com/current/server/en-us/service_viewstatus.htm#tableau-services-manager-tsm-status-page

Q76. A Tableau Server admin would like to automate the downloading of PDFs for several workbooks, to be distributed across the company. Which Tableau Server tool should be used?

- * tsm
- * tabcmd
- * tabadmin

Explanation

Link to Tableau Server documentation:

<https://help.tableau.com/current/server/en-us/tabcmd.htm>

Q77. A user is complaining that he can't see images in the subscription email. Select all the correct statements to enable this functionality:

- * User must have DOWNLOAD SUMMARY DATA permissions
- * User must have VIEW permissions
- * User must have DOWNLOAD IMAGE/PDF permissions
- * User must have at least an Explorer license

Explanation

Link to Tableau Server documentation:

https://help.tableau.com/current/server/en-us/subscribe_trouble.htm#cant-see-images-in-email

Q78. Which of the following options below best describe the correct steps to be undertaken when an organization wants to change its identity store from Local Authentication to Active Directory (or vice versa)?

- * Perform a full uninstall (including manual deletion of directories) and then reinstall Tableau Server once again
- * Refer to the REST API developer documentation for pre-built scripts that will automate this process for you
- * Run the TSM command `tsm configuration set` to update the authentication mechanism, and then restart your Tableau Server using `tsm restart` to update the settings

Explanation

Link to Tableau Server documentation:

https://help.tableau.com/current/server/en-us/reconfig_change_auth.htm

Q79. Interpret the following command:

```
tsm maintenance backup -f ts-sample_backup -d -sr monthly -st 01:00 -sd 15 -sn monthly-backup
```

- * Creates a backup schedule that runs on the 15th of each month at 1am
- * Creates a backup schedule that runs every 15 minutes starting at 1am each day

Explanation

Link to Tableau Server documentation:

https://help.tableau.com/current/server-linux/en-us/db_backup.htm#ScheduleBackups

Q80. Which Tableau Server process is responsible for external directory synchronization?

- * Backgrounder
- * Cluster Controller
- * Data Server
- * TSM Controller
- * Client File Service

Explanation

Link to Tableau Server documentation: https://help.tableau.com/current/server/en-us/groups_globalsync.htm

Q81. True or False: If your web server uses SSPI (Security Support Provider Interface), you do not need to setup Trusted Authentication

- * FALSE
- * TRUE

Explanation

Link to Tableau Server documentation: https://help.tableau.com/current/server/en-us/trusted_auth.htm

Q82. Select the correct statement below. Assume that the project content permissions are set to `‘Customizable’`:

- * If there are nested projects, permissions at the parent level take precedence over permissions at the child level
- * If there are nested projects, permissions at the child level take precedence over permissions at the parent level

Explanation

Link to Tableau Server documentation:

<https://help.tableau.com/current/server/en-us/permissions.htm>

Q83. What is the minimum number of Tableau Server nodes required to satisfy High Availability (HA) requirements?

- * 4
- * 3
- * 2
- * 8
- * 6

Q84. Tableau recommends that only two ports should be accessible to external traffic. How should the gateway and tabadmincontroller port be configured?

- * Gateway = Port 8850; tabadmincontroller = Port 80
- * Gateway = Port 80; tabadmincontroller = Port 8850
- * Gateway = Port 80; tabadmincontroller = Port 443

Explanation

Link to Tableau Server documentation:

https://help.tableau.com/current/server-linux/en-us/config_firewall_linux.htm

Q85. A Tableau Server admin would like to see how many users signed-in to Tableau Server over the past 24 hours.

Which administrative view would contain this information?

- * Traffic to Views
- * Actions by All Users
- * Actions by Specific User
- * Actions by Recent Users

Explanation

Link to Tableau Server documentation:

https://help.tableau.com/current/server/en-us/adminview_users_recent.htm

Q86. Which of the following IS NOT a correct strategy to maximize backup efficiency in Tableau Server?

- * Co-locating the Data Server with the Administration Controller node
- * Co-locating File Store on the same node as the Administration Controller
- * Co-locating the repository (pgsql) with the Administration Controller node

Explanation

Link to Tableau Server documentation:

<https://help.tableau.com/current/server/en-us/db.htm>

Q87. True or False:

Updates to a published data source flow to all connected workbooks, but only when the workbook is published to the server

- * FALSE
- * TRUE

Explanation

Link to Tableau Server documentation:

https://help.tableau.com/current/pro/desktop/en-us/publish_datasources_about.htm
