

(2022) PASS 2V0-41.20 exam with VMware 2V0-41.20 Real Exam Questions [Q45-Q65]

(2022) PASS 2V0-41.20 exam with VMware 2V0-41.20 Real Exam Questions Real exam questions are provided for VCP-NV tests, which can make sure you 100% pass NO.45 A customer has a network where BGP has been enabled and the BGP neighbor is configured on the Tier-0 Gateway. A NSX-T Data Center administrator used the get logical-routers command to retrieve this information:

```
sa-nsxedge-01> get logical-routers
```

```
Logical Router
```

UUID	VRF	LR-ID	Name
736a80e3-23f6-512d-81de-bbefb2786666	0	0	
Ports			
TUNNEL3	3		
B10ef54e-d5f3-49e5-99b7-8a51366d0592	1	1025	SR-T1-LR-01
SERVICE_ROUTER_TIER1	8		
5a5ddd63-3764-4d28-b82e-ee4c964a0dfd	3	2049	SR-T0-LR-01
SERVICE_ROUTER_TIER0	6		
0E0784db-511f-fa72-ae0b-1ccaa0262ad2	4	7	DR-T0-LR-01
DISTRIBUTED_ROUTER_TIER0	4		

Which two commands must be executed to check BGP neighbor status? (Choose two.)

- * vrf 3
- * vrf 1
- * vrf 4
- * sa-nsxedge-01(tier1_sr)> get bgp neighbor
- * sa-nsxedge-01(tier0_sr)> get bgp neighbor
- * sa-nsxedge-01(tier0_dr)> get bgp neighbor

NO.46 Which CLI command on NSX Manager and NSX Edge is used to change NTP settings?

- * et time-server
- * get timezone
- * set ntp-server
- * set timezone

NO.47 Which two choices are solutions of the NSX portfolio (Choose two.)?

- * vRealize Automation
- * NSX Distributed IDS/IPS
- * vRealize Network Insight
- * Tanzu Kubernetes Grid
- * NSX Service Mesh

NO.48 An NSX administrator has configured a load balancer virtual server on a Tier-1 Gateway.

In order to advertise the load balancer virtual IP to the Tier-0 Gateway, which route advertisement configuration has to be done on the Tier-1 Gateway? (Choose two.)

- * Advertise All LB SNAT IP Routes
- * All Static Routes
- * Information
- * Advertise All LB VIP Routes
- * Advertise All NAT Routes

NO.49 When running nsxcli on an ESXi host, which command will show the Replication mode?

- * get logical-switch <Local-Switch-UUID> status
- * get logical-switch <Logical-Switch-UUID>
- * get logical-switches
- * get logical-switch status

Explanation/Reference:

NO.50 Which CLI command on NSX Manager and NSX Edge is used to change NTP settings?

- * set time-server
- * get timezone
- * set ntp-server
- * set timezone

NO.51 Which network virtualization technologies can be used with an Ethernet VPN (EVPN) deployment in NSX-T Data Center? (Choose two.)

- * Virtual Extensible Local Area Network (VXLAN)
- * Multiprotocol Border Gateway Protocol (MP-BGP)
- * Open Shortest Path First (OSPF)
- * Multiprotocol Label Switching (MPLS)
- * Virtual Routing and Forwarding (VRF)

NO.52 How many IPs are required when deploying a highly available NSX Management Cluster with VIP in a production environment?

- * 5
- * 6
- * 3
- * 4

Explanation

NO.53 An NSX administrator is creating a NAT rule on a Tier-0 Gateway configured in active-standby high availability mode.

Which two NAT rule types are supported for this configuration? (Choose two.)

- * Port NAT
- * Source NAT
- * Destination NAT
- * 1:1 NAT
- * Reflexive NAT

NO.54 An NSX administrator would like to export syslog events that capture messages related to NSX host preparation events.

Which message ID (msgid) should be used in the syslog export configuration command as a filter?

- * SYSTEM
- * FABRIC
- * GROUPING
- * MONITORING

NO.55 What are three characteristics of a transport zone? (Choose three.)

- * defines the potential reach of transport nodes
- * configured with a Single N-VDS
- * defines the scope and reachability of a Segment

- * configured with multiple N-VDS
- * optional for creating a segment

NO.56 An NSX administrator is troubleshooting a connectivity issue with virtual machines running on an ESXi transport node. Which feature in the NSX UI shows the mapping between the virtual NIC and the host's physical adapter?

- * Switch Visualization
- * Port Mirroring
- * Activity Monitoring
- * IPFIX

NO.57 Which three services are compatible with VRF Lite? (Choose three.)

- * VPN
- * Intrusion Detection
- * NAT
- * Load Balancer
- * DHCP

NO.58 Which three steps are required to create an IPsec VPN tunnel? (Choose three.)

- * Create an IPsec service.
- * Add a local endpoint.
- * Configure an IPsec session.
- * Configure a distributed firewall policy.
- * Add a logical switch.

NO.59 Where are Distributed Firewall logs containing access decisions stored?

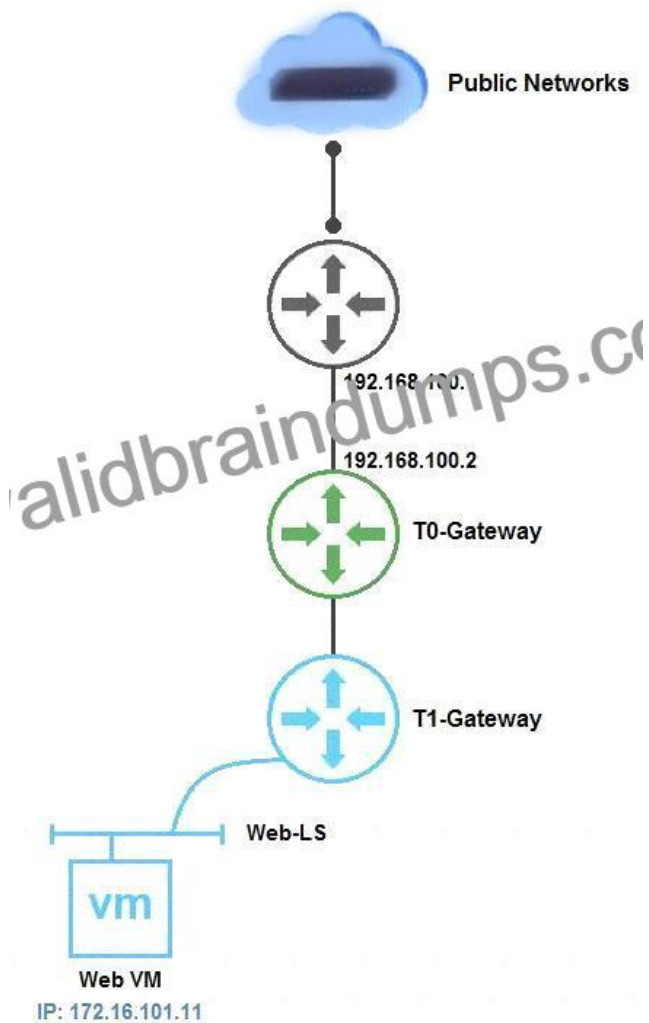

- * NSX API
- * NSX Edge
- * NSX Manager
- * Hypervisor transport node

<https://docs.vmware.com/en/VMware-NSX-T-Data-Center/3.0/administration/GUID-D57429A1-A0A9-42BE-A299-0C3C3546ABF3.html>

NO.60 Refer to the exhibit.

Which NAT type must the NSX-T Data Center administrator create on the Tier-0 or Tier-1 Gateway to allow Web VM to initiate communication with public networks?

- * SNAT
- * Reverse NAT
- * DNAT
- * 1:1 NAT

NO.61 Which two statements describe the characteristics of an Edge Cluster in NSX-T 3.0 Data Center? (Choose two.)

- * can have a maximum of 8 edge nodes
- * must have only active-active edge nodes
- * can have a maximum of 10 edge nodes
- * can contain multiple types of edge nodes (VM or bare metal)
- * must contain only one type of edge nodes (VM or bare metal)

Explanation

NO.62 An NSX administrator is troubleshooting a connectivity issue with virtual machines running on an ESXi transport node.

Which feature in the NSX UI shows the mapping between the virtual NIC and the host's physical adapter?

- * Switch Visualization

- * Port Mirroring
- * Activity Monitoring
- * IPFIX

NO.63 What are the advantages of using a Tier-0 Gateway in ECMP mode? (Choose two.)

- * stateful services leveraged
- * Failover of services
- * traffic predictability
- * traffic load balancing
- * increased north/south bandwidth

Explanation

From ICM manual:

Equal-cost multipath (ECMP) routing has several features and functions: * ECMP routing increases the north-south communication bandwidth by combining multiple uplinks.

- * ECMP routing performs traffic load balancing.
- * ECMP routing provides fault tolerance for failed paths.
- * A maximum of eight ECMP paths are supported.
- * Hashing is based on 2-tuple IP source and destination addresses.
- * ECMP routing is only available on Tier-0 gateways.

NO.64 What are the advantages of using a Tier-0 Gateway in ECMP mode? (Choose two.)

- * stateful services leveraged
- * Failover of services
- * traffic predictability
- * traffic load balancing
- * increased north/south bandwidth

From ICM manual:

Equal-cost multipath (ECMP) routing has several features and functions:

- * ECMP routing increases the north-south communication bandwidth by combining multiple uplinks.
- * ECMP routing performs traffic load balancing.
- * ECMP routing provides fault tolerance for failed paths.
- * A maximum of eight ECMP paths are supported.
- * Hashing is based on 2-tuple IP source and destination addresses.
- * ECMP routing is only available on Tier-0 gateways.

NO.65 A user is assigned these two roles in NSX Manager:

LB Admin

Network Engineer

What privileges does this user have in the system?

- * read permissions on all networking services and full access permissions on load balancing features
- * full access permissions on all networking services and full access permissions on load balancing features
- * full access permissions on all networking services and read permissions on load balancing features
- * read permissions on all networking services and read permissions on load balancing features
