Practice with C-BOBIP-43 Dumps for SAP Certified Application Associate Certified Exam Questions & Answer
REAL C-BOBIP-43 Exam Questions With 100% Refund Guarantee

SAP C-BOBIP-43 Exam Syllabus Topics:

TopicDetailsTopic 1- Use the Central Configuration Manager and Central Management Console to manage servers- Administer and manage BI content in single or multiple deploymentsTopic 2- Describe how information flows from server to server for system processes such as logging onto the system- Troubleshoot problems in SAP BusinessObjects Business Intelligence platformTopic 3- Describe the authorisation and security features in BI 4.1- Add and manage objects in SAP BusinessObjects BI platform, manage users and groupsTopic 4- Scalability, Sizing, Disaster Recovery and Lifecycle Management- Authentication, Authorization and Security

Q10. Which of the following are recommended best practices for implementing security? Note: There are 3 correct Answers to this question.

- * Assign rights to folders rather than individual objects where possible.
- * Create custom access levels for reusability.

- * Assign rights to groups rather than to users directly.
- * Assign **Denied**; rather than **Not Specified**; for the Everyone group at the root level.
- * Avoid using predefined access levels.

Q11. How does rearranging the objects in the Result pane after the query has run affect the block display?

Please choose the correct answer.

- * The objects are rearranged in the block based on the order in the Results Objects pane.
- * The reordered objects are removed from the block.
- * The block is sorted in ascending order based on the first object in the Results Objects pane.
- * The block remains unchanged.

Q12. Which of the following is responsible for controlling personalization within SAP BusinessObjects publications?

- * Access control entries
- * Access levels
- * User groups
- * Profiles

Q13. Which server processes dynamic recipient lists for publications?

- * Crystal Reports Processing Server
- * Report Application Server
- * Output File Repository Server
- * Adaptive Processing Server

Q14. From which server does the Crystal Reports Cache Server request pages?

- * Report Application Server
- * Crystal Reports Processing Server
- * Input File Repository Server
- * Adaptive Processing Server

Q15. Which tool can you use to remove a node from an existing BI clustered deployment?

- * Central Management Console (CMC)
- * BI Launchpad (BI)
- * Information Design Tool (IDT)
- * Central Configuration Manager (CCM)

Q16. What steps are recommended for sizing a deployment? Note: There are 3 correct Answers to this question.

- * Calculate SAPS value.
- * Determine if BI virtualization (for example, VMware) is used.
- * Utilize the Quick Sizer.
- * Determine the number of active concurrent users.
- * Run the System Configuration Wizard.

Q17. You want to compare the contents of the system database and the contents of the File Repository Servers.

Which tool do you use?

- * Repository Diagnostic Tool
- * SAP BusinessObjects Dashboards
- * SAP BusinessObjects Explorer
- * Information Design Tool

Q18. Which servers are used when you view an Analysis object?

There are 2 correct answers to this question.

Response:

- * Input File Repository Server
- * Adaptive Job Server
- * Adaptive Processing Server
- * Report Application Server

Q19. What can you do to improve Web response speeds? Note: There are 2 correct Answers to this question.

- * Configure an Apache Tomcat split deployment.
- * Deploy a reverse proxy server.
- * Enable compression in Apache Tomcat.
- * Move the Web Application Server into DMZ.

Q20. What can you use to update data source settings on the system database?

- * Lifecycle Management Console
- * Central Configuration Manager
- * Web Application Container Service
- * Central Management Console

Q21. What is the difference between the predefined access levels **View** and **View on Demand**?

- * View on Demand includes **Refresh report's data**, View does not.
- * View includes **Export report's data**, View on Demand does not.
- * View on Demand includes **Send to email destination**, View does not.
- * View includes **View Document Instances**, View on Demand does not.

Q22. Which of the following databases stores user activities?

- * Monitoring
- * Reporting
- * Auditing Data Store
- * Lifecycle Management

Q23. Which of the following tasks can you perform using the SAP BusinessObjects Lifecycle Management Console?

Note: There are 2 correct answers to this question.

- * Run and schedule replication jobs on a remote system.
- * Promote Business Intelligence objects from one system to another system in the same version.
- * Back up your Business Intelligence content.
- * Migrate Business Intelligence objects from a previous system version to a new system version.

Q24. What is a benefit of configuring a Server Intelligence Agent to run with a domain account instead of the local system account?

- * Meets requirement for SSO with AD Kerberos authentication
- * Reduces security risk of storing operating system passwords
- * Simplifies management of server groups across multiple hosts
- * Enables SIA to automatically start servers in other nodes

Q25. Three user groups have one custom access level defined for a specific folder. The security requirements have been changed.

Now, each of these three groups requires different rights to access the folder.

How can you achieve this?

- * Use different predefined access levels for each group and apply them to the folder.
- * Use a predefined access level for each group and apply it to the folder.
- * Make two copies of the existing access level, modify them, and apply them to the folder.
- * Modify the access level to allow each group to access the folder.

Q26. Which server manages authentication?

- * Event Server
- * Explorer Master Server
- * Central Management Server
- * Input File Repository Server

Q27. What can a user customize in the Account Preferences area of the Fiori BI launchpad? Note: There are 2 correct Answers to this question.

- * Toggle the "Use Administrator Provided Settings" option.
- * Select which tabs and tiles to display in the Home group.
- * Set the length of time that Instances remain in the Recently Run tile.
- * Identify which other users are allowed to add content to their BI Inbox.

Q28. There are two locations where you can make modifications to your Web applications; the Warfiles directory and the Tomcat directory. Which sub-directory should you use to modify the Web property files?

- * Admin
- * Custom
- * User
- * Default

Q29. What are the benefits of using Federation?

Note: There are 2 correct answers to this question.

- * It reduces the number of objects in multiple systems across geographical sites.
- * It enables a consistent rights policy across multiple offices for global organizations.
- * It provides real-time information on user activities, system KPIs, recent alerts, and watches.
- * It obtains information faster by processing reports at remote sites where data resides.

Q30. What is the correct sequence of increasing rights in the predefined access levels?

- * Schedule, View, View On Demand, Full Control
- * View On Demand, View, Schedule, Full Control
- * View, View On Demand, Schedule, Full Control
- * View, Schedule, View On Demand, Full Control

Q31. Why would you need to change the data source for your query?

Please choose the correct answer.

- * To change the universe connection of your universe
- * To use the production universe instead of the test universe
- * To use different objects from the universe
- * To change the order of execution for existing queries
