

Latest [Oct 24, 2022 SAP C-IBP-2111 Real Exam Dumps PDF [Q46-Q65

Latest [Oct 24, 2022] SAP C-IBP-2111 Real Exam Dumps PDF
C-IBP-2111 Practice Test Questions Updated 82 Questions

SAP C-IBP-2111 Exam Syllabus Topics:

TopicDetailsTopic 1- Create statistical forecast using historical data with basic methods- Use the Fiori Launchpad to customize the UI, work with Excel UITopic 2- Configure supply planning, run various solvers to generate planning results- Supply and ResponseTopic 3- Planning Operators & Application Jobs- Use Planning OperatorsTopic 4- Define and view information with user-defined charts and dashboards- Analytics and ReportingTopic 5- Create and use key figures and attributes- Key Figures & Attributes

NO.46 What options for copying will be available to you? Note: There are 2 correct Answers to this question.

- * Creation of a partial copy with a new ID along with the time profile and required master data types
- * Creation of a partial copy with a new ID along with the time profile and all master data objects
- * Creation of an exact copy with a new ID, with the time profile and master data types shared with the source
- * Creation of an exact copy with a new ID along with the time profile and master data types

NO.47 A time profile is defined with the levels of day, technical week, week, month, quarter, and year. What condition in configuration will allow you to have a different value in the current week, versus all other buckets?

- * IF(=“PERIODID2” =”,\$\$PERIODID2CU\$\$…)
- * IF(=“PERIODID5” =”,\$\$PERIODID5CU\$\$…)
- * IF(=“PERIODID4” = “,\$\$PERIODID4CU\$\$…)
- * IF(=“PERIODID3” =”,\$\$PERIODID3CUSS…)

NO.48 Which of the following can be used as inputs for inventory level optimization? Note: There are 2 correct Answers to this question.

- * Target inventory level
- * Lead time variability
- * Lot sizes
- * Reorder point

NO.49 Analytics charts are created by the user in the Advanced Analytics application. What actions are possible in the Advanced Analytics app? Note: There are 2 correct Answers to this question.

- * Group data.
- * Merge charts together.
- * Open graphics in Excel.
- * Apply filters on your data.

NO.50 What function would you use to configure a year-to-date calculation?

- * Rolling Aggregation
- * Last Period Aggregation
- * Cumulative Aggregation
- * Dynamic Rolling Aggregation

NO.51 When you promote calculated and approved inventory parameters from SAP IBP for inventory, what other IBP modules can be receiving them? Note: There are 2 correct Answers to this question.

- * SAP IBP for sales and operations
- * SAP IBP for response and supply
- * SAP IBP for demand
- * DDMRP

NO.52 What setting is mandatory in the Manage Lifecycle Planning app when introducing a new product?

- * Define which phase-in and phase-out profiles can be used within Lifecycle Planning
- * Define which key figure can be used as sales history for new products
- * Define at least one attribute of the planning area which represents the Product ID
- * Define which is the attribute ID for the Lifecycle profiles

NO.53 You define fixing for a key figure. Which of the following functions are available for this key figure? Note:

There are 2 correct Answers to this question.

- * Fixing is possible for manually editable key figures.
- * Fixing is possible for a certain quantity of a key figure value.
- * Fixing is possible for a certain period, including all child values in the hierarchy.
- * Fixing is possible for system editable key figures.

NO.54 You want to set up demand sensing to analyze demand changes in execution or close to execution windows. Which of the following conditions must you consider during the setup? Note: There are 2 correct Answers to this question.

- * At setup test the system to run the demand sensing (full) algorithm weekly and the demand sensing (update) on a daily basis.
- * The result generates sensed demand data at the monthly time granularity for the full time horizon.
- * Set up the forecast model to be executed at product-location level.
- * It is mandatory to load historical lag-based snapshot data.

NO.55 You are modeling the introduction of a new product using Lifecycle Planning functionality in SAP IBP.

What is mandatory to create in your planning area for the setup of reference product(s) to work? Note:

There are 2 correct Answers to this question.

- * Planning objects for the new product
- * Definition of an attribute representing the product ID
- * Definition of Actual Sales business meaning for one key figure
- * Definition of an attribute representing the product description

NO.56 Which of the following functional areas are included in the out-of-the-box SAP Integrated Business Planning application for sales and operations? Note: There are 3 correct Answers to this question.

- * Executive review
- * Demand-driven materials requirement planning
- * Rough-cut supply planning
- * Consensus demand planning
- * Finite resource capacities planning

NO.57 You have set up a planning area and data is available. You adjust the necessary time profile settings and run the consistency check. Which settings can you change and still run a successful consistency check?

Note: There are 2 correct Answers to this question.

- * Change the past and future horizon of the levels in the time profile.
- * Remove an attribute assigned to the time profile level if the attribute is used in a planning level.
- * Add a new time profile level to the time profile.
- * Change the description of the attributes in the time profile.

NO.58 What does ABC/XYZ segmentation allow you to do? Note: There are 2 correct Answers to this question.

- * Assign more appropriate inventory algorithms to planning objects.
- * Tailor your forecast strategy and inventory optimization to segment characteristics.
- * Identify inventory items that require closer attention.
- * Analyze forecast accuracy by product class.

NO.59 Which library is used by the forecasting engine for the demand sensing algorithm?

- * Predictive analytics library
- * Demand library
- * Supply chain algorithm library
- * Heuristics library

NO.60 You want to display and edit data in different units of measure (UOM). Which of the following must you consider before you use UOM? Note: There are 3 correct Answers to this question.

- * Analytics provide the user with the option to select the target unit of measure.
- * Unit of measure is an attribute of a master data type, such as Product.
- * Units of measure are usually not time-dependent.
- * Units of measure are usually not time-independent.

- * Conversion to the target unit of measure is handled by functionality of SAP IBP Excel UI

NO.61 You are evaluating criteria for choosing the solver to support planning for a complex supply chain. What are some of the points that should be reviewed? Note: There are 2 correct Answers to this question.

- * Planning results can be generated faster by the optimizer.
- * Prioritization of demand elements one by one is achieved by heuristics.
- * Push and Pull production models are used by the optimizer.
- * Finite heuristics can achieve demand prioritization and pegging.

NO.62 You are modeling a substitution scenario associated with a promotion. What are some of the Master Data parameters that you need to maintain to ensure desired results generated by the optimizer? Note:

There are 2 correct Answers to this question.

- * Flag ‘Disable Substitution of Location Products’
- * Loc-Prod Subst Valid-From Date
- * Promotion duration
- * Location Product Sub Cost Rate

NO.63 What are some of the prerequisites for configuring a planning area that results in a successful consistency check? Note:

There are 2 correct Answers to this question.

- * Configure at most two input key figures on the same planning level in a key figure calculation.
- * Assign the compound master data type and its component master data types.
- * Specify a planning horizon in the planning area for each level of the assigned time profile.
- * Configure at least one calculated key figure for the planning area.

NO.64 Which of the following key functions are supported by SAP IBP for sales and operations? Note: There are

2 correct Answers to this question.

- * Manual creation of feasible constrained plans
- * Finite resource planning
- * A basic demand planning process
- * An advanced demand planning process

NO.65 You are reviewing the master data types for supply planning. Which master data types are compound master data types?

Note: There are 2 correct Answers to this question.

- * LOCATIONFR
- * SOURCELOCATION
- * SOURCECUSTOMER
- * SOURCEPRODUCTION
