Verified VMCE2021 exam dumps Q&As with Correct 260 Questions and Answers

NEW QUESTION 69

Which of the following options describe the Veeam Data Mover Service function most accurately? Choose two options.
* Analyzes the system and installs and upgrades necessary components and services, depending on the role selected for the server
* Copies VM files
* Reduces load on the network and helps speed up restores
* Performs data compression, deduplication and data transfer

NEW QUESTION 70

Which Veeam Backup & Replication feature can be leveraged to perform a manual verification of a virtual machine backup?
* On-Demand Sandbox for Storage Snapshots
* Quick Rollback
* SureReplica with network disconnected

* Instant VM recovery with network disconnected

https://helpcenter.veeam.com/docs/backup/vsphere/surebackup_manual.html?ver=95

NEW QUESTION 71

Once it has been deployed and data has been collected, which Veeam product can estimate when Backup Repositories will run out of disk space and will tell you how much more disk space you will need if you continue doing backups the same way?

* Veeam Deployment Analyzer
* Veeam Backup Enterprise Manager
* Veeam ONE
* Veeam Backup & Replication

NEW QUESTION 72

When is Veeam-provided (software level) encryption used for tape media?

* If the original backup file is not encrypted
* If the “Tape protection” option is selected by the user
* If the hardware encryption is disabled at the tape device level or not supported
* By default for all of the tape jobs

https://helpcenter.veeam.com/docs/backup/hyperv/encryption_tape.html?ver=95

NEW QUESTION 73

If you need to run a script to stop a service in order to get an application-consistent backup on a Windows server, where can the script be run?

* In the guest processing setting of the job, enable application-aware processing and add a pre-freeze script to the VM
* Configure the script to run on the Veeam Backup & Replication server using the Windows Task Scheduler
* Copy the script to the VM and schedule the script to run prior to the start of the backup job using the Windows Task Scheduler in the VM
* In the virtual machines setting of the job, add a script in the scripts tab under “Run the following script before the job:”

NEW QUESTION 74

Which permission roles can be assigned in Veeam Backup Enterprise Manager for delegation of responsibilities? (Choose three.)

* Restore Operator
* db_owner
* Portal Administrator
* Power User
* Portal User

https://helpcenter.veeam.com/docs/backup/em/veeam_backup_em_roles.html?ver=95

NEW QUESTION 75

A Backup Administrator needs to create an offsite backup job. A Windows-based server is used as a repository. Which placement of the Veeam Data Mover Service(s) would result in the most optimal configuration?

* One – at the remote target site
* One – at the production site
* At least two – one at the production site and one at the remote site
* Veeam Data Mover services are not required to transfer data offsite

NEW QUESTION 76

Which of the following statements are true when comparing a synthetic full backup to an active full backup, on a NTFS-based Backup Repository? (Choose two.)
* In terms of content and retention, the synthetic full backup file is identical to an active full backup file
* The synthetic full backup file has a .vsb extension, whereas the active full backup has a .vbk extension
* Synthetic full backups impose less load on the production environment
* If the backup repository performance is weak, creating synthetic full backups is the best choice
* Synthetic full backups consume more network bandwidth

NEW QUESTION 77

Which backup method will always produce a full backup as the most recent restore point?
* Forever Forward Incremental backup
* Reverse Incremental backup
* Forward Incremental backup
https://helpcenter.veeam.com/docs/backup/vsphere/reversed_incremental_backup.html?ver=95

NEW QUESTION 78

How is the cloud repository functionality licensed for virtual machines by Service Providers?
* Per host socket
* Per overall VM socket
* Per host CPU
* Per number of VMs
https://helpcenter.veeam.com/docs/backup/cloud/cloud_connect_licensing.html?ver=95

NEW QUESTION 79

Which of the following is the extension of a Veeam Backup & Repletion configuration backup file?
* The file extension is specified in the configuration backup sellings.
* .bco
* .vbm
* .cbo
* .vbk

NEW QUESTION 80

Which of these repository types can NOT be an extent of the scale-out backup repository?

(Choose two.)
* Another scale-out repository
* A cloud repository
* A Shared Folder (CIFS/SMB share)
* A deduplicating storage appliance
* A Windows server
* A Linux server
https://www.veeam.com/blog/ultimate-faq-for-scale-out-backup-repository.html

NEW QUESTION 81

When you back up regular or standalone VMs in vCloud Director, which of the following is captured and stored in Veeam’s
Backup & Replication backup file? (Choose three.)
* vApp metadata
* VM disk content
* Raw device mapping
* In-guest iSCSI disk
* VM metadata
* Linked clone VM’s prior to vCenter 6.5

https://helpcenter.veeam.com/docs/backup/vsphere/vcloud_regular_vm_restore.html?ver=

NEW QUESTION 82

Which Vepdm Backup & Replication feature component is able to utilize Microsoft SQL Server transaction log backups for
point-in-time restore?
* U-AIR Microsoft SQL Recovery wizard
* Instant Recovery
* Full VM Restore
* Veeam Explorer for Microsoft SQL

NEW QUESTION 83

A company is required to have a daily backup with a retention of at least six weeks. The backups are running every eight hours
during the day. From the options provided, what backup job would you advise based on their SLA and best practices?
* Forever forward incremental backup, with default job settings enabled
* Forever forward incremental backup, with a retention of 42 restore points, savings six weekly full backups
* Forever forward incremental backup, with a retention of 42 restore points
* Forward incremental backup with weekly synthetic full backups and a retention of 42 days

NEW QUESTION 84

Which of the following Veeam Backup & Replication jobs can utilize storage snapshots on VMware vSphere?

Choose two options.
* Replication
* Backup copy
* VeeamZIP
* Backup
* Tape
* VM copy

NEW QUESTION 85

In Veeam Backup & Replication, encryption works at which of the following levels:

(Choose three.)
* Backup job
* Tapes in media pools
* Backup Copy job

* VM Copy job
* Replication job

https://helpcenter.veeam.com/docs/backup/vsphere/data_encryption.html?ver=95

NEW QUESTION 86

What is replica metadata used for?
* Storinga set of VM configuration files
* Storing replica temporary cache
* Detecting changed blocks of data between two replica states

Replica metadata used to store replica checksums. Veeam Backup & Replication uses this file to quickly detect changed blocks of data between two replica states. A metadata file is written to the backup repository.

NEW QUESTION 87

What is the name of the process Veeam creates for each remote console session?
* Satellite
* Transport
* Gateway
* Data Mover

NEW QUESTION 88

Which prerequisites are necessary in order to complete a configuration restore on a Veeam Backup & Replication v9.5 Backup Server? (Choose two.)
* Veeam Backup Enterprise Manager is installed
* All Veeam Backup & Replication jobs are stopped
* All of the servers added to the Veeam Backup & Replication infrastructure are online
* None of the jobs are targeting the repository where the configuration backup is located
* Configuration Backup was created using version 8.0 Update 3 or newer

NEW QUESTION 89

A scale-out backup repository is configured with data locality policy. How is an extent selected during an active full backup? (Choose two.)
* Always the same extent as the previous full backup
* An extent determined based on load control settings and free space
* A different extent from the previous chain to avoid single point of failure, if possible on free space
* It tries the same location as the previous full if using a deduplication appliance

NEW QUESTION 90

What is the stabilization point in a SureBackup job?
* When all recovery verification tests can be started
* When backup file is successfully verified
* When thevirtual machine starts booting
* When all recovery verification tests are passed

NEW QUESTION 91

If the compression level and deduplication settings are changed in an existing job, previously created backup files will:

* Be deleted after creating a new active full backup
* Change according to the new settings
* Decompress and compress again with the new compression level
* Remain the same

https://helpcenter.veeam.com/docs/backup/hyperv/compression_deduplication.html?ver=95u4

NEW QUESTION 92

Which backup method will always produce a full backup as the most recent restore point?

* Forever forward incremental backup
* Forward incremental backup
* Reverse incremental backup
* Forward incremental with transform

NEW QUESTION 93

When is the full backup created in a backup copy job for each GFS retention point?

* Never. Backup copy jobs do not use full backups.
* After the simple retention policy is met and the .vbk has been updated to the scheduled date
* On the day that the full backup is scheduled
* Each GFS point is made when an active full is run on the backup.
