Latest Oracle 1z0-1077-22 Practice Test Questions, Oracle Order Management Cloud Order to Cash 2022 Implementation Professional Exam Dumps

Q47. How does Order Management interact with multiple fulfillment systems to fulfill sales order lines?

- * It has a web service broker that routes requests from the Fulfillment Task Layer.
- * It has a web service broker that routes requests from the External Interface Layer.
- * The Fulfillment system routing is defined in the orchestration.
- * The sales order lines are converted to Fulfillment Lines and fed to the Fulfillment systems.

Q48. You are implementing the entire suite of Supply ChainManagement Cloud for an auto component manufacturing and distribution company. This company has a manufacturing facility where different auto electrical components are produced to fulfill the demand that originates from various customers. One of the components that the company sells to its customers requires specialized operations; therefore, the company outsources it to an external manufacturer instead of producing it in its own facility.

Which two steps are required to fulfill the demand for this component through outsourced manufacturing?

(Choose two.)

- * Define this component as an Item with the Contract Manufacturing field enabled and the Make or Buy attribute set to Buy;
- * Define this component as an Item with the Contract Manufacturing field enabled and the Make or Buy attribute set to Make;
- * Select the Customer Sales Order Fulfillment check box under the Procurement offering.
- * Create a sourcing rule of the Buy type for this component in the selling inventory organization.
- * Model the manufacturer to which the component production is outsourced as a Supplier in the enterprise.
- * Create a sourcing rule of the Make type for this component in the selling inventory organization.

Q49. Your company has a warehouse that is classified as two different zones to enforce allocation and picking from only one subinventory at a time. The business has a contract with a specific outbound logistics carrier to deliver all orders for a particular customer zone or postal code.

How do you release orders that are scheduled to be fulfilled from a particular subinventory and delivered through a specific carrier?

Order	Item	Item Description	Ordered Quantity	UOM	Warehouse Zone / Sub Inventory	Ship Method
10001	CM6755020	8" Black Case with Bluetooth Keyboard	1	Ea	Zone1	ABC
10001	AT1501010	Vision Networking 150x 10Gb Switch	1	Ea	Zone2	ABC
20001	CM6755020	8" Black Case with Bluetooth Keyboard	1	Ea	Zone1	XYZ
20001	AT1501010	Vision Networking 150x 10Gb Switch	1	Ea	Zone2	XYZ

- * Define pick wave release rules specifying the shipment method and the subinventory on the Demand Selection Criteria tab.
- * Define a release sequence rule using the attribute as subinventory.
- * Use a picking rule specifying the pickling order for the subinventory.
- * Define pick wave release rules specifying the shipment method and pick from a subinventory under the Options tab.
- * Define a release sequence rule using the attribute as shipment priority.

Q50. What is the configuration required to automatically calculate the Jeopardy Score and priority when an orchestration process is planned or re-planned?

- * Schedule the process refresh and start the order promising server.
- * Check the change mode parameter to Advanced on the orchestration process.
- * Schedule the process plan orchestration processes.
- * Check the Replan Instantly parameter in the orchestration process.

Explanation

You can enable the Replan Instantly feature when you define an orchestration process. It replans the orchestration process immediately after this process completes the orchestration process step, and then displays the revised order data according to the replanning work that it does. It is recommended that you use Replan Instantly only for high priority sales orders, or with sales orders

that include a jeopardy threshold of less than one day. For performance reasons, it is recommended that you do not use it with an orchestration process step that is long or complex. If Replan Instantly does not contain a check mark, then Order Management updates the planning data only during the scheduled replanning.

Q51. In the Cloud Order Managementsystem, identify the function performed by the External Interface Layer.

- * It manages the communication between Order Management and external or internal fulfillment systems.
- * It sends information to downstream fulfillment systems, and interprets responses and updates from those systems.
- * It receives information from upstream order capture systems, sends information to downstream fulfillment systems, and interprets responses and updates from those systems.
- * It imports orders and processes them to fulfillment lines before assigning them to fulfillment systems.

Q52. How can split fulfillment lines in Order Management be managed independently?

- * Split fulfillment lines can be managed independently because they are often being shipped from different warehouses.
- * Split fulfillment lines can be managed with an orchestration process instance that has been created for them.
- * Split fulfillment lines cannot be managed independently.
- * Split fulfillment lines can be managed independently because they have different attributes.

Q53. Which twoattributes can you use to group shipment lines into a single shipment? (Choose two.)

- * Carrier
- * FOB
- * Item
- * Sales Order
- * Ship-to location

Explanation

A shipment comprises a set of shipment lines, grouped by certain common shippingattributes, that are scheduled to be shipped to a customer's ship-to location on a specific date and time. You can include items from different sales orders in a shipment. You can either manually or automatically group shipment lines to create a shipment. The shipment lines are grouped by the mandatory default criteria: ship-from location and ship-to location. However, you may also include additional grouping criteria, such as customer, freight terms, FOB (Free on board), and shipping method.

Q54. Identify two valid use cases where a process assignment rule is defined to assign an orchestration process.

(Choose two.)

- * when you require multiple orchestration processes for one fulfillment line
- * when you require one orchestration process for one fulfillment line
- * when you require one orchestration process for sales order lines
- * when you require one orchestration process for multiple fulfillment lines

Q55. The warehouse manager of your companywants manual intervention to handle the allocated materials and to backorder the sales order lines in case of any physical discrepancies in the stock before pick confirmation. The warehouse manager wants to enforce manual picking followed by auto ship confirmation based on the picked quantity without any further manual intervention.

What is the correct shipment configuration to meet this requirement?

- * Disable Auto Confirm Picks, deselect the check box 'Create Shipments'; and schedule the Create Shipmentprocess.

- * Disable Auto Confirm Picks and select the check box Create Shipments; in Pick Wave Release Rule.
- * Disable Auto Confirm Picks, deselect the check box Create Shipments; and schedule the Confirm shipment process.
- * Disable Auto Confirm Picks, select the check box Create Shipments; and schedule the Confirm Shipment process.

Q56. Your customer has requested that sales order details are sent to his e-mail address. How will Order Management Cloud format the order details in the e-mail?

- * Order Management will include the order details in an attached Word document.
- * Order Management will include the order details in an attached PDF (Portable Document Format).
- * You cannot send order details through an e-mail.
- * Order Management will include a link to a webpage with order details in the body of the e-mail.
- * Order Management will include the order details in the body of the e-mail.

Q57. Your customer requires changes be made to the Order Management work areas. The customer would like to rearrange the tab layout and hide attributes. Which statement is true about this requirement and customizations that an administrator will be able to make?

- * An administrator can only hide attributes and cannot rearrange the tab layout.
- * An administrator can rearrange the tab layout, hide attributes, and add custom components such as links.
- * An administrator cannot customize anything within the Order Management work areas.
- * An administrator can rearrange the tab layout, hide attributes, and change default widths of columns and panels.
- * An administrator can only add content and rearrange the tab layout. They cannot hide attributes.

Q58. Which three statements are true about Discount Lists? (Choose three.)

- * Users can define discounts for configurable models on Discount Lists.
- * Discount rules can be defined at multiple levels: the root item, the components, or the entire configuration.
- * Discount rules can be defined at the root level only.
- * Tier and attribute-based adjustments are supported only at the root item level.
- * Tier and attribute-based adjustments are supported at multiple levels: the root item, the components, or the entire configuration.

Q59. Which three statements are false in regard to integrating public Global Order Promising web services with external order capture and management systems? (Choose three.)

- * You can collect Sales Orders that are scheduled in external order management systems into Global Order Promising.
- * No steps are required to enable calling Global Order Promising by using public web services.
- * The services cannot be used to inquire about the availability of supply for a potential order before the order is created in Oracle Order Management.
- * Several steps are required to enable calling Global Order Promising by using public web services.
- * You cannot collect Sales Orders that are scheduled in external order management systems into Global Order Promising.

Q60. Identify three ongoing maintenance tasks that a user is required to execute from the Order Management Work Area after the Order Management Implementation is completed. (Choose three.)

- * Manage Fulfillment Line Exceptions
- * Manage Order in Errors
- * Manage Order Orchestration Messages
- * Manage Source Systems
- * Manage Orchestration Statuses

Q61. Your company is implementing Order Management Cloud to manage the sales orders but fulfillment happens through third party logistics (3PL).

What process should be executed to communicate to the 3PL system that the sales orders are ready to pick release and ship?

- * Manage Shipments Interface
- * Create Shipments
- * Confirm Shipments
- * Generate Shipments Request
- * Send Shipments Advice

Explanation

References: http://docs.oracle.com/cloud/latest/scmcs_gs/FAIMS/FAIMS1796462.htm#FAIMS2605728

Q62. You are in the process of setting up a constraint that prohibits update to an extensible flexfield in a fulfillment line if Ship From Warehouse is X and the fulfillment line is booked. You are able to see the extensible flexfield on the [Manage Constraint Entities](#) page but not on the [Manage Processing Constraints](#) page.

What could be the reason?

- * The [generate packages](#) program was not submitted.
- * The [Publish extensible flexfield](#) process was not run.
- * The extensible flexfield is not enabled.
- * A [Record Set](#) needs to be created for the extensible flexfield to be visible on the [Manage Processing Constraints](#) page.

Explanation

A record set is a group of records that are bound by common attribute values for the purpose of constraint evaluation. You can define conditions and specify a record set to be validated for a given condition as defined by the validation template.

Q63. What are the three future types of supply planned orders that GOP can consider? (Choose three.)

- * Transfer Planned Orders
- * Buy Planned Orders
- * Scrap Planned Orders
- * Rework Planned Orders
- * Make Planned Order

Explanation

Future supply can include the supply that results from planned orders of three types: make, buy, or transfer.

Q64. Your company is using Order Management Cloud to capture orders, and has integrated with a legacy inventory application for order fulfillment. A fulfillment request needs to be aggregated and sent to an external inventory application.

What step would you perform to aggregate the request?

- * Create a new custom task by using the Shipment Task Layer.
- * Create a new custom task by using the Fulfillment Task Layer.
- * Create a new custom task by using the Supply Task Layer.
- * Configure a fulfillment task routing rule with aggregation criteria based on time limit or total number of lines.

Q65. Select the two principle elements of the pack functionality in shipping execution. (Choose two)

- * Trip
- * Delivery
- * Trip stop
- * Delivery line
- * License plate number

Q66. Identify the Order Management configuration setup that must be performed by a system administrator in order to define an external source system connector.

- * The source system needs to be called by using the web service from Cloud Order Management.
- * The source systems link needs to be registered in Manage Web Service.
- * The connector service needs to be registered by using Manage Web Service.
- * The source system needs to be registered in Manage Web Service.
