

## Online Questions - Valid Practice To your C\_MDG\_1909 Exam (Updated 80 Questions) [Q11-Q25]

Online Questions - Valid Practice To your C\_MDG\_1909 Exam (Updated 80 Questions)

Practice To C\_MDG\_1909 - Remarkable Practice On your SAP Certified Application Associate - SAP Master Data Governance Exam

Learn about the objective of SAP C\_MDG\_1909 Certification Exam

The SAP C\_MDG\_1909 exam is designed to test your knowledge on the concepts covered in the SAP C\_MDG\_1909 exam. The questions will be based on the SAP C\_MDG\_1909 exam objectives. It will help you prepare for the exam and help you learn and understand the concepts. This exam will help you to know about the latest concepts and technology. **SAP C\_MDG\_1909 Dumps** will help you to prepare for the certification exam. Consultant recommend you to read the SAP C\_MDG\_1909 practice the questions before taking the exam. Derivatives and Financial Accounting are two of the areas that are covered in this certification. Templates are essential for any business process. Cross priority selling is one of the most important skills required in any organization. Transfer of information is one of the important aspects of the SAP C\_MDG\_1909 exam. Growth is one of the core areas that are covered in this certification. Correct the issues that are reported is one of the most important concepts that are covered in the SAP C\_MDG\_1909 exam. Search for the information is one of the most important concepts required in any organization. Free demo is one of the ways to try the product. Active customers can get the latest version of the product. Highly recommended for all the professionals.

Extension is a key factor to consider when you buy a software. Including the SAP C\_MDG\_1909 exam is essential to make your career successful. Table of Contents and chapter wise is another way to prepare for the exam. Duplicates are the same as the SAP

C\_MDG\_1909 exam. Enterprise and the information systems are two of the main concepts covered in the SAP C\_MDG\_1909 exam. Huge step changed database design and development. Activation is one of the core skills that are required in the organizations. Domains and application are two of the most important concepts in any organization. Times to prepare are the most important concepts that you should know before taking the certification exam. Technologies used in the SAP C\_MDG\_1909 exam are the most important concepts that are covered in the certification. Existing and new users are the concepts that are required to pass this certification. Workflow is one of the most important concepts that are required in any organization. Question paper and practice test will help you to get a good score. Hours to prepare are another key factor to consider when you buy a software.

**NO.11** What is use cases for data transfer?

- \* An initial load in the MDG implementation phase, such as importing data into a new MDG system.
- \* An initial load while operating MDG, such as importing data from new client systems into an already-running MDG system.
- \* High volume delta loads from already connected client systems.
- \* High volume exports from MDG to client systems.
- \* Export Master Data

**NO.12** You use File Download to extract supplier master data from the SAP Master Data Governance system. What content can you download?

Please choose the correct answer.

- \* Many complete supplier master data records in one step, if BP is the current standard data model in your user master.
- \* Selected parts of many supplier master data records of one entity type (of storage usage type 1 or 4) in one step, if BP is the current standard data model in your user master.
- \* Any storage usage type, if BP is the current standard data model in your user master.
- \* Selected parts of many supplier master data records of one entity type (of storage usage type 1 or 4) in one step, independent of the current standard data model in your user master.

**NO.13** How to use context-based adaptations?

- \* The adaptation of a FPM application depends on runtime parameters. A particular adaptation, or configuration, is applied when the application is called.
- \* CBA reduces the need to make extra copies of application configurations.
- \* The parameters for CBA are provided by the generic MDG schema USMD\_GEN: OTC, logical action, change request type, and change request step.
- \* Each adaptation of a configuration contains only the delta changes to its base configuration.
- \* None of the above.

**NO.14** Which services can trigger a consolidation process (integration scenario)? Note: There are 3 correct answers to this question.

- \* Open match groups
- \* Data from source systems
- \* Replication of activated data
- \* Validation
- \* Best record calculation

**NO.15** Which of the following statements are true for editions in SAP Master Data Governance, Financials? Note:

There are 2 correct answers to this question.

- \* They ensure consistent financial master data across the entire organization.
- \* They can be used to collect and release changes together at a certain date
- \* They ensure high-quality master data and a single version of the truth.
- \* They are used to control the validity of the master data.

**NO.16** You want to reduce the impact on system performance after a mass data load by avoiding the non-intentional replication of large amounts of data. Which replication modes are applicable? Note: There are 2 correct answers to this question.

- \* SOA-based replication
- \* Filters and change pointers
- \* Limit changes using time interval
- \* DRFLOG transaction

**NO.17** You want to determine the next processors of an SAP MasterData Governance (MDG) change request without any ABAP programming. What options are available for you to do this? There are 3 correct answers to this question.

- \* Organization management transaction PPOME and the corresponding customizing
- \* A workflow step condition that is defined in the Workflow Builder transaction SWDD
- \* A specific assignment of a single user or a special user (for example, previous processor or requester) in the workflow configuration
- \* The mail configuration, where you can monitor SAP MDG mails using transactions U SOST and SCOT
- \* A direct assignment to a specific role built in PFCG in Business Rule Framework plus

**NO.18** You are adding a custom entity as a list user interface buildingblock (UIBB) to the corresponding user interface. The UIBB should be visible based on the type of change request. What is the correct way to do this?

Choose the correct answer.

- \* Customize the UI configuration to add a new list UIBB for the custom entity. Use the feeder class to hide the UIBB.
- \* Customize the UI configuration to add a new list UIBB for the custom entity. Use context based adaptation to configure the UI based on the change request type.
- \* Create a new change request type. Adjust the UI configuration to add a new list UIBB for the custom entity. Use context based adaptation to configure the UI based on the step number.
- \* Create a new change request type. Adjust the UI configuration to add a new list UIBB for the custom entity. Use the feeder class to hide the UIBB.

**NO.19** You are designing a business workflow and need to ensure the master data is accurate and conforms to all business rules.

Which of the following options are available? Note: There are 2 correct answers to this question.

- \* Set up additional validations using Business Rule Framework plus (BRFplus).
- \* Set up additional validations using a BADL.
- \* Set up validation rules during replication of the master data.
- \* Set up validation rules in SOA/ALE during master data processing.

**NO.20** What are the elements of a complete UI configuration?

- \* One FPM application configuration for USMD\_OVP\_GEN, which can include one FPM adaptable OVP configuration for CBA
- \* Supports integration scenarios based on a Service Oriented Architecture (SOA) especially used WEB-Services,
- \* Integrates into existing integration technologies e.g. Application Link Enabling (ALE) especially Intermediated Documents (IDoc).
- \* Allows for an easy growth path; from existing technology to SOA because it wraps the different communication channels

**NO.21** The status of the change request and the workflow step are used in the process logic of the workflow in order to determine the following:

- \* The possible actions in the UI.
- \* The next workflow step.
- \* The next change request status.

\* None of the above.

**NO.22** What are the features of generic search configuration parameters?

- \* The Search Criteria and Search Results areas can be configured by creating your own configuration for the Web Dynpro application USMD\_SEARCH.
- \* The Search Control area is included automatically. The visibility of it and its drop-down lists is controlled by parameterization and configuration.
- \* Overall, three entity types are created. One for the design study name (ZHRCHNAME), one for the work packages (ZWPHIER), and one for the year (ZYEAR).
- \* Additional UI elements are available that can be added to the single item maintenance UI in order to maintain information on higher level nodes and predecessors

**NO.23** You need to create and process a custom entity (storage/use type 4) in reuse mode in data mode IBP. What do you enhance?

There are 3 correct answers to this question.

- \* The data model with the new entity
- \* The access handling with a custom handler class
- \* The GENU component
- \* A change request type with the new entity
- \* The workflow considering the new entity

**NO.24** Which information can you monitor on process level using the audit trail? There are 3 correct answers to this question.

- \* The authorization assigned to actual processor
- \* The number of data sets processed in each step
- \* The processors of the process steps
- \* The number of rollbacks for process steps
- \* The details when the configuration was changed

**NO.25** Changes from other systems or business processes shall automatically trigger change requests in SAP Master Data Governance (MDG). What do you use to implement this request?

Please choose the correct answer.

- \* Change request API
- \* Enrichment Spot
- \* Governance and convenience API
- \* Data Replication Framework

Learn about the best solution for the preparation of SAP C\_MDG\_1909 Exam

Our **SAP C\_MDG\_1909 Dumps** are the best solution for the preparation of the SAP C\_MDG\_1909 Exam Certification. It will provide you with a set of questions that are similar to those that appear in the real exam. You can easily pass the exam. There is a lot of money in this certification. Therefore, it is very beneficial to everyone. PDF format is the best way to prepare for the certification.

You can use this certification at any place. You can use this practice test in the classroom as well. Furthermore, you need to spend time for preparation of the certification. It will save your time and energy. Take the case of an individual who is preparing for a big exam like the SAP C\_MDG\_1909 Exam Certification.

**True C\_MDG\_1909 Exam Extraordinary Practice For the Exam:**
