

## Get The Important Preparation Guide With C-TS411-2021 Dumps [Q48-Q70]

### Get The Important Preparation Guide With C-TS411-2021 Dumps Get Totally Free Updates on C-TS411-2021 Dumps PDF Questions

The SAP C\_TS411\_2021 Exam is a computer-based test that consists of 80 multiple-choice questions, and candidates are given 180 minutes to complete it. The exam covers a range of topics, including the R&D Engineering process, the SAP S/4HANA R&D Engineering solution architecture, data modeling, and master data management. Candidates must demonstrate their understanding of these areas by answering questions related to them.

The SAP C-TS411-2021 exam is designed for individuals who want to validate their knowledge and skills in the field of SAP S/4HANA R&D Engineering. SAP S/4HANA is an integrated enterprise resource planning (ERP) software that provides real-time insights into business operations, enabling organizations to make data-driven decisions. The C-TS411-2021 exam focuses on the application of SAP S/4HANA in the research and development (R&D) engineering process, including the creation and management of bills of materials (BOMs), engineering change management, and product costing.

**NO.48** How can you restrict the search result?Note: There are 2 correct Answers to this question.

\* Filters

- \* Change number
- \* Validity
- \* Reselect

**NO.49** Which prerequisites must be fulfilled before a configuration profile can be created and released for a configurable material?

- \* At least one variant class must be assigned to the configurable material. Values must be assigned to the characteristics here.
- \* At least one variant class must be assigned to the configurable material.
- \* At least one variant class must be assigned to the configurable material. Values must not be assigned to the characteristics here.
- \* Exactly one variant class must be assigned to the configurable material.

**NO.50** The Work Center provides default values for the routing. Which of these default values is a mandatory entry if an operation is created in the routing?

- \* Standard text key
- \* Control key
- \* Standard value key
- \* Work Center

**NO.51** Which of the following objects can you connect with a revision level? Note: There are 2 correct Answers to this question.

- \* Classes
- \* Document
- \* Work Center
- \* Material Master

**NO.52** Which scenario is possible when you create plant specific data with the Product Master app?

- \* You can define multiple plant information outside Product Master.
- \* You can only define one plant information inside Product Master.
- \* You can only define one plant information outside Product Master.
- \* You can define multiple plant information inside Product Master.

**NO.53** You want to use a procedure to set a value in a single-level configuration using a variant table T1. Variant table T1 has only two characteristics C1 and C2. C1 is a key field. The following syntax is incorrect: table T1 (C1 = C1, C2 = C2) Where do you have to insert \$self?

- \* table T1 (\$self.C1 = C1, C2 = C2)
- \* table T1 (C1 = \$self.C1, C2 = C2)
- \* table T1 (C1 = C1, C2 = \$self.C2)
- \* table T1 (C1 = C1, \$self.C2 = C2)

**NO.54** Which type of object dependencies must contain \$self, \$parent, or \$root at least once?

- \* Procedures
- \* All types of object dependencies
- \* Pre- and Selection Conditions
- \* Constraints

**NO.55** The processing mode is set in the configuration profile and in the object dependencies. What needs to be taken into account? Note: There are 3 correct Answers to this question.

- \* The processing mode of object dependencies assigned to BOM and routing must always be **Classic**; (independent of the configuration profile).
- \* The processing mode of object dependencies assigned to characteristics and characteristic values must be the same as that of the configuration profile.
- \* The processing mode of dependencies assigned to characteristics and characteristic values must always be **Advanced**

Variant Configuration (independent of the configuration profile).

- \* The processing mode of object dependencies assigned to the configuration profile must be the same as that of the configuration profile.
- \* The processing mode of object dependencies assigned to BOM and routing must be the same as that of the configuration profile.

**NO.56** Which configuration process/scenario prevents the display of a BOM explosion in the sales order? Note: There are 2 correct Answers to this question.

- \* Sales Order (SET) for both processing modes
- \* Order BOM with processing mode AVC
- \* Order BOM with processing mode classic and standard settings
- \* Planned/Production Order without BOM explosion for both processing modes

**NO.57** You write object dependencies for a BOM item. In the single-level configuration, you query the configuration for the header material. Which syntax elements have the same meaning?

- \* None of these. \$self, \$parent and \$root address different levels.
- \* \$self = \$root
- \* \$self = \$parent
- \* \$parent = \$root

**NO.58** What is the advantage of the Engineering Workbench in comparison to standard material BOM and routing maintenance? Note: There are 3 correct Answers to this question.

- \* Material BOMs, routings, work centers, and material masters can be created and changed.
- \* Material BOMs and routings can be processed together.
- \* Only the Engineering Workbench allows you to make changes to material BOMs and routings using Engineering Change Management.
- \* You can save changes to material BOMs and/or routings and release them for other persons without leaving the Engineering Workbench.
- \* Using a special, optional lock logic, several people can make changes to the same material BOMs and/or routings.

**NO.59** To which object of a Task List can you directly assign production resources/tools?

- \* Material assignments
- \* Operations
- \* Sequences
- \* Headers

**NO.60** The customer wants to see the cross-plant material status inside the object search in classification. How do you satisfy the customer's requirement?

- \* Add the cross-plant material status field to the database classification table.
- \* Change the screen sequence of the classification view.
- \* Create a custom data type in customizing.
- \* Create a reference characteristic.

**NO.61** You are working with VC Modeling Environment PMEVC. Complete object dependencies are created by drag & drop of one or more characteristic values into a BOM item. What can be created with this drag & drop functionality? Note: There are 2 correct Answers to this question.

- \* Selection conditions and procedures
- \* Local and global object dependencies
- \* Selection conditions only
- \* Local object dependencies only

**NO.62** What controls the material BOM item category?Note: There are 2 correct Answers to this question.

- \* A work center is required.
- \* A change number is required.
- \* A material number is required.
- \* A negative quantity is allowed.

**NO.63** You connected characteristics inside one class to organizational areas. What are the benefits?Note: There are 2 correct Answers to this question.

- \* A check for the same classification is only possible inside one organizational area.
- \* A check for the same classification is possible for all organizational areas.
- \* Users can only work with characteristics depending on the authorization for a particular organizational area.
- \* Users can always see all characteristics for all areas.

**NO.64** A user releases a document info record with a change number. What effect does this action have on the document info record?Note: There are 2 correct Answers to this question.

- \* All document fields are locked.
- \* The document gets a revision level.
- \* The document displays the release key of the change number.
- \* The document info record uses the validity of a change number.

**NO.65** What happens to the group BOM when you do a plant assignment?

- \* The internal number and the BOM usage becomes new.
- \* The internal number stays unchanged and the BOM usage becomes new.
- \* The internal number becomes new and the BOM usage stays unchanged.
- \* The internal number and the BOM usage stays unchanged.

**NO.66** You can assign object dependencies to different master data.Which assignments have no effect in variant configuration and only affect classification?

- \* Assignment to Classes
- \* Assignment to Characteristic Values
- \* Assignment to Configuration Profiles
- \* Assignment to Characteristics

**NO.67** What is the easiest way to check whether a model is consistent with regard to the processing mode of the configuration profile and object dependencies?

- \* You use the Check Model function in the (VC modeling Environment PMEVC).
- \* You use the Extras function in the material configuration (Simul./ModelingCheck Model CU50).
- \* You use the function Inconsistent VC Models in the app Variant Configuration Overview.
- \* You use the Check Model function in the Simulate Configuration Models app.

**NO.68** What information does a change number header include?Note: There are 2 correct Answers to this question.

- \* Object information
- \* Change number status
- \* Parameter effectivities
- \* Change type

**NO.69** You work with a Plan./Production Order without BOM explosion scenario.Which information is available?Note: There are 2 correct Answers to this question.

- \* In the sales order, no information about the BOM is displayed except the routing.
- \* In the simulation, no information about the BOM is displayed except the routing.

- \* In the simulation, information about the BOM and routing is displayed.
- \* In the sales order, no information about the BOM and routing is displayed.

**NO.70** What kind of reports does the classification area offer?Note: There are 3 correct Answers to this question.

- \* Characteristics list
- \* Summarized class explosion
- \* Object list
- \* Classification status
- \* Class status

To prepare for the SAP C\_TS411\_2021 certification exam, candidates can attend SAP training courses, participate in online discussion forums, or read SAP books and documentation. SAP also provides practice exams and sample questions to help candidates prepare for the test.
