ACP-120 Exam Dumps Pass with Updated May-2023 Tests Dumps
ACP-120 exam questions for practice in 2023 Updated 28 Questions

Atlassian ACP-120 (Jira Cloud Administrator) Certification Exam is designed to assess the knowledge and skills of IT professionals who are responsible for managing and administering Jira Cloud. Jira Cloud is a project management and issue tracking tool that helps teams to plan and manage their work efficiently. The certification exam is aimed at validating the expertise of individuals in configuring, customizing, and maintaining Jira Cloud instances.

QUESTION 14

DEV and ENG projects share the same permission scheme. Users of both projects also work in a single board that shows both DEV and ENG issues.

However some users cannot move issues across the board or move issues between the two projects. Identify the configuration related to this problem. (Choose one)

* Product access

- * Project permissions
- * Board permissions
- * Global permissions
- * Security levels

QUESTION 15

Which configurations do Not have any impact on email notifications sent to users

- * Workflow post functions
- * Version Configurations
- * Custom Events
- * Permission Schemes

QUESTION 16

Which three statements are correct about deleting a user account (Choose three)

- * Access to all products and administration functions will be lost
- * Issues that were created by a deleted account will be deleted
- * Individual users can delete their unmanaged accounts
- * Accounts can only be deleted if they have no issues assigned
- * Organization admins can delete managed accounts

QUESTION 17

You are the site and organization admin of a Jira Software and Confluence instance.

You are the only administrator and you don't have any Trusted users.

Users currently cannot send invitations to anyone. You need to control the number of licenses used.

Therefore, you want to either invite individual users or approve individual user requests.

Which site access setting will meet this requirement? (Choose one)

- * Approve any domain
- * Approve your organization domain only
- * Don't approve any domain
- * Enable Jira Software and Confluence invite links
- * Enable existing users to send invitations to anyone

QUESTION 18

You are a site admin for your company.

Which function can you NOT perform? (Choose one)

- * Enable Single Sign On for your Atlassian Cloud site(s)
- * Configure products in your Atlassian Cloud site(s)
- * Enable invite links for your products
- * Deactivate a Cloud site
- * Manage users and groups

QUESTION 19

Alana has set up a new incoming mail handler to create issues or add a comment to an existing issue.

All new issues should be unassigned to triage them individually. You have not set up any components.

Sometimes issues are being randomly assigned to various users upon creation.

Which configuration can cause the observed behavior? (Choose one)

- * An Update Issue Field workflow post function
- * The CC Assignee setting of the mail handler
- * The Default Assignee project setting
- * An Assign to Lead Developer workflow post function

QUESTION 20

Gary complains that he is not getting any notifications when issues are updated.

According to the notification helper, he should receive notifications for all issues he is watching. His coworkers confirm they receive those notifications and they regularly update issues that he is watching.

Which update to Gary's personal settings must have occurred (Choose one)

- * The setting Watch your issues was disabled
- * The setting You make changes to the issue was disabled
- * The setting You're watching the issue was disabled
- * The setting Email notifications format was changed

QUESTION 21

A team in your company requests a new Jira project that fulfills the following requirements:

- * Ability to work on issues in weekly iterations
- * Allows the project administrators to create their own fields

The project should fulfill these requirements right after creation without the need to enable additional features.

Which project should you create?

- * A company-managed project with Kanban template
- * Company-managed project with Scrum template
- * Team-managed project with Kanban template
- * Team-managed project with Scrum template

QUESTION 22

Your organization uses Jira Software and Confluence. Dave is a new employee who needs the following privileges

- * Approve access requests
- * Manage group memberships

* Update billing details

You need to give him enough but not too many privileges How should you configure Dave's user account? (Choose one)

- * As a member of the jira-administrators and confluence-administrators group
- * As a site administrator
- * As an organization administrator
- * As a member of the administrators group
- * As a trusted user

QUESTION 23

You are setting up Jira Software Cloud for an organization of 250 employees. Product access is already configured to grant new users access to Jira Software by default You now need to configure site access so that it meets these 3 conditions

1. Minimum administration overhead is required
2. Access is granted to the entire organization at the same time
3. Access is restricted only to your organization

Which solution meets these requirements? (Choose one)

- * Set the global mode to public and enable CAPTCHA on sign up
- * Create an invite link and share it with all current and future employees
- * Enable existing users to send invitations to all current and future employees
- * Add all your company's domains as approved domains
- * Approve any domain in the site access settings

QUESTION 24
