E_C4HYCP1811 exam tests the candidate's ability to apply their knowledge of SAP Commerce Cloud to provide effective and efficient product support.

Q20. What must you do before you can run CronJobs in SAP Commerce Cloud?
* Set a reference to a specific job implementation within the CronJob.
* Assign a CronJob to a group of nodes to run on a configured node group.
* Configure a trigger to run at a specified time.
* Assign a CronJob to run on a node with a specified ID.

Q21. What is a Restriction?
* The WHERE clause of a FlexibleSearch statement
* A limitation of the types and attributes a user can see or edit in the Backoffice Administration Cockpit
* A way to assign access rights to users and user groups
* A fragment of the WHERE clause of a FlexibleSearch statement

Q22. What must you do when you configure the Oauth2 for SAP cloud Platform integration? Choose Three correct answers.
* Run an impEx to import the AOuthClientDetails and ExposedOAuthCredential type data in the SAP commerce Backoffice
* Configure the token endpoint URL in the SAP cloud platform cockpit
* Assign ROLE_CLIENT or ROLE_TRUSTED_CLIENT in the SAP commerce Backoffice
* Create the secret client credentials in the SAP Commerce Backoffice
* Assign the ESBMessaging send role in the SAP commerce Backoffice

Q23. How does SAP Commerce use the LDAP protocol? Choose Two correct answers.
* SAP commerce converts LDAP query results to impex
* SAP commerce imports user and group data from an external LDAP system
* SAP Commerce writes actions to the connected LDAP system
* SAP Commerce can use the DSML protocol within LDAP

Q24. What are the recommended tools to enable JDBC logs in SAP hybris?Note: There are 3 correct answers to this question.
* ImpEx
* Backoffice Administration cockpit
* Hybris configuration properties file
* Java code
* Hybris Administration console (hAC)

Q25. Your customer is planning to use a PostgreSQL database for a new project.Where do you confirm the third-party compatibility?
* SAP Store
* SAP Commerce official product documentation
* SAP Support Portal
* SAP Community

Q26. You see the following entry in the thread dumps while analyzing a systems performance: ajp-8019-43″ nid=183 state=WAITING -waiting on <0x515a41f6> (a org apache tomcat until.net.JioEndpooints$Workder) -locked <0x515a41f6> (a org.apache.tomcat.util.net.JioEndpoint$workder) At java lang Object wait(Native Method) At Java.lang Object wait(Object.java.485) At org.apache.tomat.util.net JioEndpoint$Worker.await(JioEndpoint.java.4710) At.org.apache tomcat util. net JioEndpont$Workder.run(JioEndpoint.java:497) At java.langThread.run (Thread.java.662) Locked synchronizers count=0 How do you interpret this thread dump? Choose the correct answer.
* The Tomact AJP parameter maxThreads is too small to handle simultaneous requests
* The thread is waiting for an incoming connection
* The system is about to crash as the thread is blocked and cannot perform its job
* The JVM option maxAJPThreads is too small to handle simultaneous requests

Q27. Which of the following cases should you treat as a support incident?Note: There are 2 correct answers to this question.
* A partner contacts Product Support for assistance with a custom solution.
* A partner contacts Product Support regarding a platform with slow performance.
* A partner requests information on how to customize the backoffice.
* A partner needs specialized advice regarding the architectural aspects of a project.

Q28. What happens when you set the impex legacy mode property to true? Choose Two correct answers.
* The ServiceLayer interceptors are triggered during the import/export process
* The ServiceLeayer interceptors and validators are NOT triggered during the import/export process
* The operations INSERT UPDATE and REMOVE are NOT performed by the mode/service during the import
* The operations INSERT UPDATE and REMOVE are performed by the Mode/Service during the import

Q29. Which properties can you set to use Service Layer Direct (SLD)? Choose Two correct answers.
* Set persistence legacy.mode to False in Core-spring .xml
* Set persistence legacy.mode and servicelayer prefetch to False All in the local properties
* Set the sld.enabled modifier to True in the impEx file
* Set persistence.legacy mode to False in the local properties

Q30. You are troubleshooting a connection pool issue.How do you investigate this issue?Note: There are 3 correct answers to this question.
* Request heap dumps.
* Check the physical connections.
* Request console log files and thread dumps.
* Check the configuration parameters related to connection pool.
* Request database dumps.

Q31. Which benefits does SAP BTP Extensions integration provide?Note: There are 2 correct answers to this question.
* A customization layer for SAP Commerce Cloud that depends on the API Registry module
* An alternative and independent application to SAP Commerce Cloud based on the backoffice
* An analysis layer to capture customer interactions, contexts, and behaviors for future processing
* Microservices that customize the standard functions of SAP Commerce Cloud without compromising on upgradability

Q32. Which ImpEx headers can you use to update an SAP Commerce Cloud item?Note: There are 2 correct answers to this question.
* INSERT_UPDATE UserGroup;UID[unique=true];locname[lang=en];locname[lang=de];groups(uid)[mode=append]
* INSERT_UPDATE UserGroup;UID[unique=true];locname[lang:en];locname[lang:de];groups(uid)[mode=append]
* UPDATE UserGroup;UID[unique=true];locname;groups(uid)[mode=append]
* INSERT_UPDATE UserGroup;UID;locname;groups(uid)[mode=append]

* A partner contacts SAP Product for assistance with a custom solution
* A partner requests information on how to customize the backoffice
* A partner needs specialized advice regarding the architectural aspects of a project
* A partner contacts SAP product support regarding a platform with slow performance

Q37. Which cleanup actions can you perform to reduce performance issues related to the props table?

Choose Two correct answers.
* Decrease the size of the props table the database. This result the overflowing values being rejected
* Remove all the entries from the props table since the content is irrelevant
* Remove the CronJobs that are no longer issue. This results in the corresponding log entries being deleted from the props table
* Decrease the value of the hmc string modified values size property in the local properties file. This result in the overflowing values

Q38. How do you persist changes to enable and disable JDBC logging?
* SAP Commerce Administration Console
* Java code
* Configuration properties file
* Backoffice Administration Cockpit

Q39. How does SAP Commerce use the LDAP protocol?Note: There are 2 correct answers to this question.
* SAP Commerce converts LDAP query results to ImpEx.
* SAP Commerce imports user and group data from an external LDAP system.
* SAP Commerce can use the DSML protocol within LDAP.
* SAP Commerce writes actions to the connected LDAP system.

Q40. You enable the automatic reset in the Backoffice Framework configuration.When is the reset triggered?Note: There are 2 correct answers to this question.
* After the next compilation
* After you logout
* On the next server startup
* After you login again

Q41. You need to run a FlexibleSearchService query to get results without restrictions.To whom do you assign the session?Note: There are 2 correct answers to this question.
* Admin user
* Any user that does NOT have any restrictions
* Anonymous user
* Any member of the admingroup

Q42. What should you do before you report incorrect software behavior to SAP (third-level support)?Note: There are 2 correct answers to this question.
* Test the issue on the customer’s SAP Commerce installation.
* Document the complete technical environment information of the system where the incident occurred to provide to SAP.
* Reproduce and validate the problem on the standard out-of-the-box SAP Commerce.
* Tell the customer that the reported problem will be fixed in a future patch release.

Q43. In the SAP Commerce cache, how does invalidation work on a product type? Choose Two correct answers.

* At cached FlexibleSearch results where product type is included because the result set might have changed
* Cached product items updated during the import are invalidated in all connected hybris cluster nodes and are reloaded from the database when it is used next
* Cached product items uploaded during the import are invalidated only in the node where the import is running
* All cached FlexibleSearch results are invalidated form the query result region because the result set might have changed

SAP E_C4HYCP1811 certification exam is an essential credential for professionals who work with SAP Commerce Cloud solutions. SAP Certified Product Support Specialist - SAP Commerce Cloud certification validates the candidate's expertise in SAP Commerce Cloud product support, incident management, and troubleshooting. By passing E_C4HYCP1811 exam, candidates can demonstrate their skills and knowledge to potential employers and enhance their career prospects in the field of SAP Commerce Cloud.
