NEW QUESTION 198

Which parameter is used in the spanning tree protocol for root bridge election?
* Port ID
* Bridge priority
* Root path cost
* Bridge ID

NEW QUESTION 199

Which layer of the OSI reference model does the router work at?
* Data link layer
* Transport layer
* Application layer
* Network layer

NEW QUESTION 200

What are the user authentication methods that can be deployed in wlan? (Multiple choice)
* Portal authentication
* MAC authentication
* Radius certification
* 802.1X authentication

NEW QUESTION 201

The load sharing mode at both ends of the Eth-Trunk can be inconsistent.
* TRUE
* FALSE

NEW QUESTION 202

In the campus network, network reliability can be improved by using link aggregation and stacking technology.
* True
* False

NEW QUESTION 203

Which of the following statements about the division of OSPF protocol area is wrong?
* Area 0 is the backbone area, and other areas must be connected to this area
* The LSDBs in the routers in the same OSPF area are completely consistent
* Dividing OSPF areas can reduce the LSDB scale of some routers
* Only ABR can be used as ASBR

NEW QUESTION 204

Which of the following is not the reason for RSTP improving the convergence speed?
* Introduction of edge ports
* Fast switching of the root port
* P/A mechanism
* Forward Delay canceled

NEW QUESTION 205

A DHCP server is deployed in the network, but the administrator found that some hosts did not correctly obtain the address specified by the DHCP server. What are the possible reasons? (Multiple choice)
* The address pool of the DHCP server has all been allocated
* Some hosts cannot communicate with the DHCP server normally, and the client systems of these hosts automatically generate addresses in the range of 169.254 0.0
* There is another DHCP server in the network that works more efficiently
* Some hosts cannot communicate with the DHCP server normally, and the client systems of these hosts automatically generate addresses in the range of 127.254.0.0

NEW QUESTION 206

The configuration of the country code will affect the actual transmission frequency and maximum transmission power.
* True
* False

NEW QUESTION 207

The administrator wants all hosts to be unable to access the Internet between 8:00-17:00 every day, so which ACL rule needs to be bound to the traffic-filter outbound in the GO/0/1 interface allocation?

* time-range am9topm5 08:00 to working-day Acl number 2003 rule 5 deny time-range am9topjni5
* time-range am9topm5 08:00 to 17:00 off-day # acl number 2004 rule 5 permit time-range
* time-range am9topm5 08:00 to 17:00 daily acl number 2001 rule 5 deny time-range am9topm5
* time-range am9topm5 07:00 to 18:00 daily Acl number 2002

NEW QUESTION 208

On the VRP platform, what is the role of the command “interface vlanit <vlan-id>” ?

* Create a VLAN
* No such command
* Create or enter VLAN virtual interface view
* Configure VLAN for a port

NEW QUESTION 209

In order to distinguish different users and provide different network services on the AP. Which of the following can be configured?

* VT
* VAP
* VAC
* WAP

NEW QUESTION 210

Regarding the IPv6 address 2031:0000:720C:0000:0000:09E0:839A:130B, which of the following abbreviations is correct?

* 2031:0:720C:0:0:9E:839A:130B
* 2031:0:720C::9E0:839A:130B
* 2031:0:720C:0:0:9E0:839A:130B
* 2031::720C::9E0:839A:130B

NEW QUESTION 211

The following rules exist in a certain ACL of the router. rule deny tcp source 192.168.1.0 0.0.0.255 destination 172.16.10.1 0.0.0.0 destination-port eq 21 Which statement is correct?

* The source IP is 192.168.1.1, the destination IP is 172.16.10.1, and all TCP packets whose destination port number is 21 match this rule
* The source IP is 192.168.1.1, the destination IP is 172.16.10.2, and all 1CP packets whose destination port number is 21 match this one
* The source IP of the rule is 192.168.1.1, the destination IP is 72.16.10.3. All TCP packets with the destination port number of 21 match this rule
* The type of ACL is a basic ACL

NEW QUESTION 212

By default, in the SNMP protocol, which port number does the agent process use to send alarm messages to NS?

* 164

* 163
* 162
* 161

NEW QUESTION 213

If the network address of a network is 10.1.1.0/30, what is its broadcast address?
* 10.1.1.2
* 10.1.1.3
* 10.1.1.4
* 10.1.1.1

Huawei H12-811-ENU exam, also known as the HCIA-Datacom V1.0 exam, is a certification test designed for IT professionals who want to validate their skills and knowledge in data communication technologies. H12-811-ENU exam covers a range of topics related to data communication, including network fundamentals, LAN switching technologies, WAN technologies, IP routing technologies, network security, and network management. Passing H12-811-ENU exam is an excellent way to demonstrate your expertise in the field of data communication and networking.

The Huawei H12-811-ENU exam is designed to test the candidate's ability to configure, maintain, and troubleshoot data communication networks. It covers a wide range of topics such as network protocols, network topologies, network devices, network security, and network management. H12-811-ENU exam consists of 60 multiple-choice questions and the candidate must complete the exam within 90 minutes.
