QUESTION 40

Your customer has created a content structure that includes different languages, processes, roles and courses.

The customer wants to grant access to the content via Library on a web server but does not know how to publish it as a single deployment without redundancies. Which solutions would you suggest? Note: There are 3 correct answers to this question.

- * Provide pre-filtered links to show only language-related content.
- * Distribute deep links to sub-trees of the structure for different target groups.
- * Create and provide filters for the library before deploying the complete structure.
- * Use the Included Dependent Objects option in the publishing rule wizard.
- * Define Manager tags per target group and tag the content accordingly.

QUESTION 41

What should you consider when rolling out Desktop Assistant? Note: There are 3 correct answers to this question.

- * The Windows user profile size on the end user machine must meet the minimum requirements for caching purposes or the caching path needs to be changed.
- * Quality assurance and general responsibility need to be clarified prior to the go-live.
- * The end user needs administration rights in Windows to run Desktop Assistant.
- * The Desktop Assistant installation requires at least 20 GB of disk space on the end user machine.
- * Bandwidth and latency have to be tested on minimum requirements because slow electronic performance support will not be accepted.

QUESTION 42

What are the characteristics of playback settings? Note: There are 2 correct answers to this question.

- * They can be modified by end users.
- * They are saved in the trainer resource.
- * They can be set on project level by using the Project Override settings.
- * When they are appended to the URL, they override default settings.

QUESTION 43

What kind of objects, structures or elements can be referenced? Note: There are 3 correct answers to this question.

- * Media objects
- * Groups
- * Text units
- * Resources
- * Workareas

QUESTION 44

Which steps are required to set up a workarea in the Manager? Note: There are 3 correct answers to this question.

- * Define a default workflow.
- * Create or import a Toolbox.
- * Set up workarea permissions using existing roles.
- * Provide customized workarea resources.
- * Set up notification settings according to the workarea.

QUESTION 45

An animation in your book page does not start in the preview. What are some possible reasons? Note: There are 2 correct answers to

this question.

- * The animation duration is set to a value lower than 1.
- * In the parameter section of the animation object, the target object is not set.
- * In the object list, the animation object is placed behind the animated object.
- * The animation is triggered by a Time Control, but the Time Control is not started.

QUESTION 46

What are the benefits of using workflows? Note: There are 2 correct answers to this question.

- * Workflows enable the author to proceed to the next content processing status without knowing the responsible contacts.
- * Workflows force all authoring roles to follow pre-defined object lifecycles.
- * Workflows allow complete automation of content production scenarios.
- * Workflows prevent standard authors from editing resources.

QUESTION 47

What is the function of the Refresh Workarea and All Objects option in Producer? Note: There are 2 correct answers to this question.

- * Refreshes the workarea cache.
- * Applies changes made at the file system level to the local workarea.
- * Updates Manager with all changes made at the file system folder level.
- * Downloads recent changes from Manager.

QUESTION 48

What are some deliverables of the strategy and configuration phase? Note: There are 3 correct answers to this question.

- * Authoring guidelines
- * A customized Producer installer
- * A custom application profile
- * An infrastructure diagram
- * A full corporate design customization

QUESTION 49

How can you deliver a role-based Desktop Assistant? Note: There are 2 correct answers to this question.

- * Activate the Desktop Assistant Tracking option in the Desktop Assistant playback settings.
- * Publish several content packages via role-filtered publishing of subtrees.
- * Connect Desktop Assistant with the target application and use the roles provided by the application.
- * Use the Roles field in Producer and publish one Desktop Assistant for all users so users can select their roles manually.

QUESTION 50

Your customer uses SAP Enable Now, cloud edition and the Desktop Assistant. They want to use an on-premise web server to deliver the content. What must they consider?

- * MIME type .inav must be supported by the web server.
- * A specific .xdnt file pointing to the web server must be created and uploaded to the Manager.
- * Desktop Assistant on-premise must be installed on each end-user machine.
- * The web server must be Microsoft IIS.

QUESTION 51

Your customer's IT department does not want to roll out Desktop Assistant. Their concern is that Desktop Assistant is not secure because it collects sensitive user data from the target application. How do you address this concern? Note: There are 2 correct answers to this question.

- * Desktop Assistant reads interface information only from the target application.
- * Information that is read by Desktop Assistant is only handled locally.
- * The collected sensitive user data is only accessible in a permission-based report.
- * The collected data will be anonymized before the data is sent back to the server.

QUESTION 52

You are planning an SAP Enable Now on-premise implementation. What must you do to ensure network security compliance? Note: There are 2 correct answers to this question.

- * Add the Upload Active Content permission to all users.
- * Contact network administrators to confirm that the network security restrictions allow the required MIME types.
- * Use standard ports only.
- * Adapt the password policy of the Manager to the password policy of the customer.

QUESTION 53

What are characteristics of sustainable knowledge production? Note: There are 3 correct answers to this question.

- * No references
- * No redundancies
- * Maintainability
- * Generic library views
- * Multi-modality

QUESTION 54

What action must you take to ensure that authors can edit content for the Web Assistant? Note: There are 2 correct answers to this question.

- * Grant edit permission to the authors for the respective workareas.
- * Assign the Master Author role to the user in SAP Enable Now Manager.
- * Activate Web Assistant edit mode for the user.
- * Request an S-User for authors to SAP Help Portal.

QUESTION 55

How do you edit course assignments in Manager once they have been set up? Note: There are 2 correct answers to this question.

- * Select the object the course was created for and select the course tab.
- * Use the Filter function and enter the object name the course was created under.
- * Search all folders in the workarea to locate the course.
- * Select Assignments in the Administration menu.

QUESTION 56

What is the purpose of the Toolbox? Note: There are 2 correct answers to this question.

- * It provides templates to the authoring team.
- * It automates steps in the content production.
- * It offers media libraries for common images.

* It distributes custom scripts to the authoring team.
