Scrum PSPO-I (Professional Scrum Product Owner I) Certification Exam is a globally recognized certification that validates a professional's knowledge and skills in the field of product ownership. PSPO-I exam is designed to test the candidate's understanding of the Scrum framework, product ownership roles and responsibilities, product vision, and stakeholder management.

Scrum PSPO-I (Professional Scrum Product Owner I) Certification Exam is an essential certification for individuals who want to become a successful product owner in the Scrum framework. PSPO-I exam tests the candidate's knowledge and understanding of the Scrum framework, product backlog management, and product value delivery. Professional Scrum Product Owner I certification helps individuals enhance their skills and knowledge in product ownership and management, which are crucial for achieving business goals and objectives.

NEW QUESTION 310

Self-managing teams do not require a Product Owner as they manage the Product Backlog without this accountability.

- * FALSE
- * TRUE

NEW QUESTION 311

Which statement is not correct about the Scrum Daily?

- * It should be held at the same time and place.
- * It is a time boxed event (15 min).
- * The developers have to participate in the meeting.
- * It is moderated by the Scrum Master.

NEW QUESTION 312

A self-managing Scrum Team can decide to stop doing Daily Scrums.

- * TRUE
- * FALSE

NEW QUESTION 313

Who is required to attend the Daily Scrum?

- * The Product Owner
- * The Project Lead
- * The Developers
- * The Scrum Master

NEW QUESTION 314

What are the purposes for the Daily Scrum?

- * To adapt the Sprint Backlog as necessary.
- * To inspect progress toward the Sprint Goal.
- * To adjusting the upcoming planned work.

NEW QUESTION 315

Which two of the following are correct about the Product Owner accountability (role = outdated term)?

- * Prioritizes the Sprint Backlog
- * Answering questions regarding the Product Backlog Items
- * Is responsible for maximizing the product value

NEW QUESTION 316

Adding a new member to the Developers may cause a short-term decrease in your teams productivity.

- * True
- * False

NEW QUESTION 317

Scrum combines four formal events for inspection and adaptation within a containing event, the Sprint.

- * FALSE
- * TRUE

NEW QUESTION 318

Scrum is based on empiricism. All of its artifacts must be transparent to ensure sufficient accuracy of inspection. How can the Scrum Team maintain the Product Backlog to maximize its transparency?

(choose the best answer)

- * The Product Backlog is only updated at the Sprint Review, when both the Scrum Team and the stakeholders are available.
- * Product Backlog items should hold no more than 8 points of work, which is the average in the range of acceptable sizes of 1, 2, 3, 5, 8, and 13.
- * Product Backlog items must be sized such that the highest ordered items are no bigger than a Sprint.
- * The Product Backlog is only updated at a release planning meeting with the stakeholders and the change control board present.
- * The Product Backlog is continually kept up to date with the most recent insights.

Explanation

The Scrum Team can maintain the Product Backlog to maximize its transparency by continually keeping it up to date with the most recent insights because:

- * It reflects the current state of the product and the work. The Product Backlog is a dynamic and emergent artifact that represents all the possible features, functions, requirements, enhancements, and fixes that
- * constitute changes to the product. By updating it frequently, the Scrum Team can ensure that the Product Backlog is accurate, complete, and relevant.
- * It enables the Product Owner to optimize the value of the product and the work of the Scrum Team. The Product Owner is accountable for effective Product Backlog management, which includes ordering, refining, and communicating the Product Backlog items. By updating it frequently, the Product Owner can incorporate new learnings, feedback, opportunities, and changes into the product decisions and priorities.
- * It supports the inspection and adaptation of the Scrum Team and the stakeholders. The Product Backlog is a source of information and transparency for everyone involved in the product development. By updating it frequently, the Scrum Team and the stakeholders can inspect the progress and outcomes of each Sprint, and adapt their plans and actions accordingly.

References:

- * Scrum Guide 2020, page 10: The Product Backlog is an emergent, ordered list of what is needed to improve the product.
- * Scrum Guide 2020, page 11: The Product Owner is accountable for effective Product Backlog management, which includes ensuring that the Product Backlog is transparent, visible and understood.
- * Scrum Guide 2020, page 11: The ordering of the items in the Product Backlog is the sole responsibility of the Product Owner. They order Product Backlog items to best achieve goals and missions.
- * Scrum Guide 2020, page 11: Higher ordered Product Backlog items are clearer and more refined than lower ordered ones.
- * Scrum Guide 2020, page 15: The Sprint Review is an informal meeting, not a status meeting, and the presentation of the

Increment is intended to elicit feedback and foster collaboration.”

NEW QUESTION 319

What should you do, if Scrum Teams become too large?

- * Talk to the Program Manager about the situation.
- * Nothing. The productivity and effectiveness will increase in bigger teams.
- * Consider reorganizing into multiple cohesive Scrum Teams, each focused on the same product.

NEW QUESTION 320

Which two of the following answers are not correct about the Product Owner accountability (role = outdated term)?

- * The Product Owner decides which developer does what.
- * The Product Owner has to participate in the Daily Scrum.
- * The Product Owner measures the progress of a release.
- * The Product Owner is responsible for maximizing the value.

NEW QUESTION 321

Scrum Teams are self-managing, meaning they internally decide who does what, when and how.

- * FALSE
- * TRUE

NEW QUESTION 322

Changes that endanger the Sprint Goal achievement are allowed.

- * TRUE
- * FALSE

NEW QUESTION 323

The Sprint Review is considered as a “formal meeting”.

- * True
- * False

NEW QUESTION 324

Scrum Master is a management role.

- * True
- * False

NEW QUESTION 325

Each artifact contains a commitment. For the Product Backlog, it is the:

- * Product Goal
- * Definition of Ready
- * Definition of Done
- * Sprint Goal
