[Aug-2024] Dumps Practice Exam Questions Study Guide for the C\_ACTIVATE22 Exam  
C\_ACTIVATE22 Dumps with Practice Exam Questions Answers

### SAP C\_ACTIVATE22 Exam Syllabus Topics:

TopicDetailsTopic 1- Describe the methodology foundation, its phases, and key activities- Explain how to transform your existing solution into SAP S- 4HANA CloudTopic 2- Describe the agile project roles and responsibilities and the preparation of the project including the planning- Transition Path Private and Public CloudTopic 3- Describe the different activities of an SAP project- Explain how to build solutions following a cloud-oriented approach

### QUESTION 49

What is scrum of scrum?

- \* Alternative to regular scrum process for smaller teams
- \* Frequent inspections of code and configuration prior to quality gates
- \* Mechanism for gathering and validating requirements

- \* Integration meeting between the various project teams

#### QUESTION 50

What is the most granular level of the methodology you can view in the SAP Roadmap Viewer?

- \* Task
- \* Deliverable
- \* Workstream
- \* Phase

#### QUESTION 51

In which phase do you verify that the SAP Best Practices content meets the customer's business needs, and then capture gaps?

- \* Deploy
- \* Prepare
- \* Explore
- \* Realize

C is correct because in the Explore phase, you verify that the SAP Best Practices content meets the customer's business needs, and then capture gaps. This is done through a fit-to-standard workshop, where you compare the customer's business requirements with the standard SAP functionality, and document any gaps or deviations as user stories. Verified :

#### QUESTION 52

Which of the following are workshop design principles/guidelines? Note: There are 2 correct answers to this question.

- \* Fit-to-standard
- \* Expert configuration definitions
- \* Best Practices enablement
- \* Active participation

#### QUESTION 53

Which of the following steps are part of the fit-to-standard process? Note: There are 2 correct answers to this question.

- \* Design to-be business process models
- \* Review Best Practices process flow
- \* Document integration requirements
- \* Enable customers on standard business processes

B is correct because reviewing Best Practices process flow is one of the steps that are part of the fit-to-standard process. The Best Practices process flow is a diagram that shows the standard SAP functionality and configuration for a scope item. The project team reviews the Best Practices process flow with the customer to demonstrate how the solution supports their business processes, and to identify any gaps or extensions that need to be addressed.

D is correct because enabling customers on standard business processes is one of the steps that are part of the fit-to-standard process. The project team enables customers on standard business processes by providing them with access to a starter system, where they can explore and test the predefined configuration and sample data for each scope item. The project team also provides customers with training materials and guidance on how to use the solution. Verified :

#### QUESTION 54

Which of the following considerations apply when determining the project methodology? Note: There are 3 correct answers to this

question.

- \* Implementation fit
- \* Project Manager fit
- \* Organizational fit
- \* Project fit
- \* Solution fit

A is correct because implementation fit is one of the considerations that apply when determining the project methodology. It means that the project methodology should match the type and scope of the implementation, such as cloud, on-premise, hybrid, or mixed scenarios.

C is correct because organizational fit is one of the considerations that apply when determining the project methodology. It means that the project methodology should suit the culture and maturity of the organization, such as its readiness for change, agility, and innovation.

D is correct because project fit is one of the considerations that apply when determining the project methodology. It means that the project methodology should align with the characteristics and constraints of the project, such as its size, complexity, duration, and budget. Verified :

### QUESTION 55

Which systems are part of the private cloud edition landscape? Note. There are 2 correct answers to this question.

- \* Sandbox
- \* Evaluation
- \* Production
- \* Starter

### QUESTION 56

What does the content element of SAP activate provide? There are 3 correct answers to this question.

- \* Functional specifications for WRICEF development
- \* Migration content
- \* Business processes content
- \* Integration content
- \* End-user guides

### QUESTION 57

Which Value Chains does SAP Solution Manager 7.2 deliver? Note: There are 3 correct answers to this question.

- \* Request-to-Fulfill
- \* Requirements-to-Deploy
- \* Cash-to-Order
- \* Hire-to-Retire
- \* Detect-to-Correct

### QUESTION 58

You are defining the testing strategy for your project. What would you include in a Scope of Integration test?

- \* The connectivity between database and application servers
- \* The functionality of end-to-end business processes
- \* The functionality of modular processes

- \* The network communication

### QUESTION 59

Which activity helps the project team identify and add user stories to the backlog?

- \* Preparing a project schedule and budget
- \* Planning the User Acceptance Testing
- \* Conducting the fit-to-standard workshop
- \* Assessing project risks and issues

### QUESTION 60

Which of the following are examples of ready-to-run SAP S/4HANA system? There are 2 correct answers to this question

- \* SAP Mission control centre
- \* Fully activated appliance
- \* SAP model company
- \* SAP best practices explorer

### QUESTION 61

What is the difference between the System Conversion and New Implementation transition paths to SAP S/4HANA? Note: There are 2 correct answers to this question.

- \* Custom code is adjusted in System Conversion and developed in New Implementation of SAP S/4HANA in the Realize phase.
- \* Data is migrated in System Conversion and converted in New Implementation of SAP S/4HANA in the Realize phase.
- \* Custom code is developed in System Conversion and adjusted in New Implementation of SAP S/4HANA in the Realize phase.
- 4
- \* Data is converted in System Conversion and migrated in New Implementation of SAP S/4HANA in the Realize phase.

A is correct because custom code is adjusted in System Conversion and developed in New Implementation of SAP S/4HANA in the Realize phase. In System Conversion, the existing custom code needs to be adapted to run on SAP S/4HANA. In New Implementation, new custom code needs to be developed to meet the customer's specific requirements.

D is correct because data is converted in System Conversion and migrated in New Implementation of SAP S/4HANA in the Realize phase. In System Conversion, the existing data needs to be converted to the new data structures and formats of SAP S/4HANA. In New Implementation, new data needs to be migrated from the legacy system or other sources to SAP S/4HANA. Verified :

### QUESTION 62

What term is used for a ready-to-run SAP S/4HANA system with pre-built solution Documentation

- \* Best practice system
- \* Fully activated appliance
- \* SAP model company
- \* SAP cloud appliance library

### QUESTION 63

You are implementing SAP S/4HANA Cloud, public edition for your customer. How are your customer systems activated?

- \* Via the SAP Contact Center
- \* Via the Central Business Configuration System
- \* Via the SAP Business Technology Platform

\* Via the SAP Cloud ALM

#### QUESTION 64

When conducting an upgrade of an SAP S/4HANA Cloud, public edition three system landscape, in which phase are the Business Roles updated?

- \* Discover
- \* Deploy
- \* Realize
- \* Explore

#### QUESTION 65

Which functionality is available in Focused Build?

- \* Integration Monitoring
- \* Test Management
- \* User Experience Monitoring
- \* Custom Code Management

#### QUESTION 66

What accelerator can help you document the configuration definition in the Explore phase?

- \* Data definition
- \* Change request template
- \* Test strategy
- \* Backlog template

D is correct because the backlog template is an accelerator that can help you document the configuration definition in the Explore phase. The backlog template is a document that contains the user stories that describe the configuration requirements and gaps for each scope item. It also includes the acceptance criteria, priority, effort estimation, and dependencies for each user story. Verified :

#### QUESTION 67

What findings do you document in the Explore Phase workshops? Note: There are 3 correct answers to this question.

- \* Business role mapping
- \* Key business decisions
- \* Detailed design of extensions
- \* Confirmation of scope
- \* Process models

B is correct because key business decisions are one of the findings that you document in the Explore Phase workshops. Key business decisions are the choices that the customer makes regarding their business processes, such as organizational structure, master data, reporting, or integration. These decisions affect the configuration and customization of the solution, and need to be documented and approved by the customer.

D is correct because confirmation of scope is one of the findings that you document in the Explore Phase workshops. Confirmation of scope is the validation that the customer agrees with the scope items that are selected for their solution, and that they understand the functionality and limitations of each scope item. This helps to ensure that there are no misunderstandings or misalignments between the customer and the project team.

E is correct because process models are one of the findings that you document in the Explore Phase workshops. Process models are graphical representations of the business processes that show the sequence of activities, roles, and systems involved in executing the

process. Process models help to visualize and communicate the business requirements and scenarios, and identify any gaps or extensions that need to be addressed. Verified :

### QUESTION 68

Which of the following steps are part of the fit-to-standard process? Note: There are 2 correct answers to this question.

- \* Design to-be business process models
- \* Enable customers on standard business processes
- \* Document integration requirements
- \* Review Best Practices process flow

### QUESTION 69

In which of the following do you use a work item in Focused Build?

- \* Epics
- \* Waves
- \* Sprints
- \* Releases

### QUESTION 70

In which phase do you run the User Acceptance Test?

- \* Final Preparation
- \* Deploy
- \* Realize
- \* Build and Test

### QUESTION 71

Which of the following tools facilitate secure communication between SAP cloud solutions and protected on-premise networks that CANNOT be accessed directly from the Internet?

- \* Cloud Integration Automation service
- \* Identity Authentication service
- \* SAP Connectivity service
- \* SAP Business Technology Platform

### QUESTION 72

What does the Side-by-Side extensibility option mean?

- \* Extensibility is based on the SAP Business Transformation Platform (BTP) and published APIs.
- \* There are two SAP S/4HANA instances: one for standard code and another for custom developments.
- \* SAP S/4HANA extensions are context-aware and focused on tight integration.
- \* Reporting is transferred to an enterprise data warehouse based on SAP BW/4HANA

### QUESTION 73

What solution operation framework can customers use to create a joint business and IT organisation that will secure transparency and efficiency of SAP implementation.

- \* SAP operations control centre
- \* SAP Activate

- \* Customer centre of expertise
- \* Business transformation management methodology
