C_ACT_2403 Certification - The Ultimate Guide [Updated 2024]
C_ACT_2403 Practice Exam and Study Guides - Verified By ValidBraindumps

NEW QUESTION 23

What does the Side-by-Side extensibility option mean?
* SAP S/4HANA extensions are context-aware and focused on tight integration.
* There are two SAP S/4HANA instances: one for standard code and another for custom developments.
* Extensibility is based on the SAP Business Transformation Platform (BTP) and published APIs.
* Reporting is transferred to an enterprise data warehoused based on SAP BW/4HANA
* C is correct because extensibility based on the SAP Business Technology Platform (BTP) and published APIs is what the Side-by-Side extensibility option means. Side-by-Side extensibility is a type of extensibility that allows customers to create custom applications or extensions that run on a separate platform, such as SAP BTP, and communicate with the SAP S/4HANA system via published APIs.

Side-by-Side extensibility enables customers to enhance their SAP S/4HANA solution without modifying the core code or configuration, and to leverage the capabilities of SAP BTP, such as cloud services, development tools, or integration options. Verified References:

* : [Extensibility Options for SAP S/4HANA], page 9

NEW QUESTION 24

Which of the following are SAP Activate workstreams?Note: There are 2 correct answers to this question.
* Change Management
* Project Management
* Extensibility
* Data Migration
* B is correct because Project Management is one of the SAP Activate workstreams. The Project Management workstream covers all the activities related to planning, executing, monitoring, controlling, and closing the project. It includes tasks such as defining project scope, schedule, budget, resources, risks, issues, quality, communication, and stakeholder management.

* D is correct because Data Migration is one of the SAP Activate workstreams. The Data Migration workstream covers all the activities related to preparing, extracting, transforming, validating, and loading data from legacy systems to SAP systems. It includes tasks such as defining data migration strategy, scope, approach, tools, roles, responsibilities, quality criteria, and testing scenarios. Verified References:

* : SAP Activate Methodology Workstreams Names update

* : SAP Activate Testing Workstream

NEW QUESTION 25

Which of the following are levels in the structure of an SAP Best Practices for SAP S/4HANA Solution Package?Note: There are 2 correct answers to this question.
* Configuration Guides
* Scope Items
* Building Blocks
* Business Process Scenarios
* B is correct because Scope Items are one of the levels in the structure of an SAP Best Practices for SAP S/4HANA Solution Package. A Scope Item is a unit of business functionality that covers one or more business processes. A Scope Item has a description, a list of configuration steps, and a set of test cases.

* C is correct because Building Blocks are one of the levels in the structure of an SAP Best Practices for SAP S/4HANA Solution Package. A Building Block is a reusable component that contains configuration data, master data, or transactional data for a specific business area. A Building Block can be assigned to one or more Scope Items. Verified References:

* : [SAP Best Practices Explorer]

NEW QUESTION 26

When conducting an upgrade of an SAP S/4HANA Cloud, public edition three system landscape, in which phase are the Business Roles updated?
* Explore
* Realize
* Deploy
* Discover
* A is correct because in the Explore phase, the Business Roles are updated when conducting an upgrade of an SAP S/4HANA

Cloud, public edition three system landscape. The Business Roles are the roles that define the access rights and authorizations for the users in the system. The Business Roles are updated to reflect the changes and enhancements that are introduced by the upgrade, such as new apps, features, or functions. Verified References:

* : SAP S/4HANA Cloud Upgrade Guide, page 11

NEW QUESTION 27

When applying a cloud mindset in a greenfield Implementation, which of the following should you consider?Note: There are 2 correct answers to this question.
* Use supported extensibility technologies
* Use quality gates
* Apply SAP quality principles
* Ensure transparency on deviations
* A is correct because a cloud mindset means embracing the cloud capabilities and avoiding unnecessary customizations that could impact the performance, scalability, and maintainability of the solution.

Therefore, using supported extensibility technologies is important to ensure compatibility and compliance with the cloud environment.

* D is correct because a cloud mindset also means ensuring transparency on deviations from the standard SAP functionality and documenting the rationale and impact of any customizations or extensions that are required to meet the customer needs. Verified References:

* : SAP Activate Project Management Certification Guide, page 129

* : SAP Activate Methodology for SAP S/4HANA Cloud, page 16

NEW QUESTION 28

Which additional scope option does the strategic advisory service for cloud analytics offer?Note: There are 2 correct answers to this question
* Extended package
* SAP S/4HANA for central finance
* Baseline package
* SAP Activate methodology for the Intelligent Enterprise
* A is correct because the extended package is an additional scope option that the strategic advisory service for cloud analytics offers. It provides a deeper analysis of the customer’s current analytics landscape and a more detailed roadmap for the cloud analytics transformation.

* C is correct because the baseline package is an additional scope option that the strategic advisory service for cloud analytics offers. It provides a high-level assessment of the customer’s current analytics landscape and a general roadmap for the cloud analytics transformation. Verified References:

* : Strategic Advisory Service for Cloud Analytics

NEW QUESTION 29

When deploying a new implementation on-premise, which of the following is recommended when performing custom development?
* SAP Business Technology Platform

* SAP Best Practices
* SAP API Business Hub
* SAP ABAP Workbench
* D is correct because when deploying a new implementation on-premise, it is recommended to use SAP ABAP Workbench for custom development. SAP ABAP Workbench is a tool that allows developers to create, modify, and enhance ABAP programs and applications in an on-premise system. It provides various features, such as syntax check, debugging, testing, and transport management. Verified References:

* : ABAP Workbench

NEW QUESTION 30

According to the Definition of Done, which activity must be completed for each Sprint?
* End-user training must be delivered
* The solution must be built and configured in the development system (DEV)
* Functionality must be released to the business
* Functionality must be tested in the production system (PROD)
* B is correct because according to the Definition of Done, the solution must be built and configured in the development system (DEV) for each Sprint. This means that all user stories in the Sprint backlog must be completed, tested, and accepted by the product owner in the DEV system before moving to the next Sprint. Verified References:

* : SAP Activate Project Management Certification Guide, page 114

NEW QUESTION 31

Which of the following considerations apply when determining the project methodology? Note: There are 3 correct answers to this question.
* Implementation fit
* Project Manager fit
* Organizational fit
* Project fit
* Solution fit
* A is correct because implementation fit is one of the considerations that apply when determining the project methodology. It means that the project methodology should match the type and scope of the implementation, such as cloud, on-premise, hybrid, or mixed scenarios.

* C is correct because organizational fit is one of the considerations that apply when determining the project methodology. It means that the project methodology should suit the culture and maturity of the organization, such as its readiness for change, agility, and innovation.

* D is correct because project fit is one of the considerations that apply when determining the project methodology. It means that the project methodology should align with the characteristics and constraints of the project, such as its size, complexity, duration, and budget. Verified References:

* : SAP Activate Methodology for SAP S/4HANA Cloud, page 13

NEW QUESTION 32

What is the difference between the “New Implementation of SAP S/4HANA Cloud, public edition” and the

“New Implementation of SAP S/4HANA, private edition” transition paths? Note: There are 2 correct answers to this question

* SAP S/4HANA Cloud, public edition does NOT offer built-in capabilities for extensibility, while SAP S/4HANA Cloud, private edition offers a full development environment

* -I SAP S/4HANA Cloud, private edition is only available through SAP Cloud services and with embedded implementation services from SAP

* Upgrades of SAP S/4HANA Cloud, public edition are based on SAP timelines, and upgrades of SAP S/4HANA Cloud private edition are based on timelines agreed between SAP and the customer

* SAP S/4HANA Cloud, private edition uses the Implementation Guide (IMG) and SAP S/4HANA Cloud, public edition uses SAP Central Business Configuration.

* C is correct because upgrades of SAP S/4HANA Cloud, public edition are based on SAP timelines, and upgrades of SAP S/4HANA Cloud, private edition are based on timelines agreed between SAP and the customer. This is one of the differences between the two transition paths. SAP S/4HANA Cloud, public edition has mandatory quarterly upgrades that are performed by SAP, while SAP S/4HANA Cloud, private edition has optional upgrades that are scheduled by the customer in coordination with SAP.

* D is correct because SAP S/4HANA Cloud, private edition uses the Implementation Guide (IMG) and SAP S/4HANA Cloud, public edition uses SAP Central Business Configuration. This is another

* difference between the two transition paths. SAP S/4HANA Cloud, private edition allows more flexibility and customization in the configuration, while SAP S/4HANA Cloud, public edition follows a guided and standardized configuration process. Verified References:

* : [SAP S/4HANA Cloud Editions]

* : [Central Business Configuration Overview]

NEW QUESTION 33

You are implementing SAP S/4HANA Cloud, public edition for your customer.How are your customer systems activated?
* Via the SAP Cloud ALM
* Via the SAP Contact Center
* Via the Central Business Configuration System
* Via the SAP Business Technology Platform
* C is correct because the Central Business Configuration System (CBC) is a tool that enables customers to activate their SAP S/4HANA Cloud, public edition systems by following guided steps and entering configuration data. Verified References:

* : Central Business Configuration Overview

NEW QUESTION 34

Which of the following are cornerstones of SAP’s security strategy? Note: There are 3 correct answers to this question
* Secure Company
* Secure Projects
* Secure Operations
* Secure Infrastructure
* Secure Products
* A is correct because Secure Company is one of the cornerstones of SAP’s security strategy. It means that SAP ensures that its own organization, employees, and processes comply with the highest security standards and regulations.

* C is correct because Secure Operations is one of the cornerstones of SAP’s security strategy. It means that SAP ensures that its cloud services are operated securely and reliably, with measures such as data protection, encryption, backup, monitoring, and incident response.

* E is correct because Secure Products is one of the cornerstones of SAP’s security strategy. It means that SAP ensures that its software products are developed securely and follow best practices such as secure coding, testing, and patching.

NEW QUESTION 35

What information does the project team need before they can correctly estimate the relative size of backlog user stories? Note: There are 2 correct answers to this question.
* Available project resources
* Definition of Ready
* Definition of Done
* Benchmark user story

Definition of Done is the information that the project team needs before they can correctly estimate the relative size of backlog user stories. Definition of Done is a set of criteria that determines when a user story is considered complete and ready for acceptance by the product owner. It helps the team to align their expectations and assumptions on each user story, and provide consistent and reliable estimates.

NEW QUESTION 36

How do you set up Scrum teams?Note: There are 2 correct answers to this question.
* Based on end-to-end processes like order-to-cash
* By type of work, like configuration Scrum, documentation Scrum, and testing Scrum
* As a cross-functional team covering multiple functions, like configuration, data loads, and v u testing
* Based on group size, but a minimum of 12 people

* A is correct because based on end-to-end processes like order-to-cash is one of the ways to set up Scrum teams. This way, the Scrum teams are organized around the business value streams that they support, and they have a clear understanding of the customer needs and expectations. This also helps to reduce dependencies and handovers between teams, and to optimize the flow of work.

* C is correct because as a cross-functional team covering multiple functions, like configuration, data loads, and testing is one of the ways to set up Scrum teams. This way, the Scrum teams have all the skills and competencies that they need to deliver a complete and working product increment in each Sprint. This also helps to increase collaboration and communication within the team, and to foster a sense of ownership and accountability.

NEW QUESTION 37

What can you find in the SAP Fiori apps reference library? Note: There are 3 correct answers to this question.
* Shortcut to the Quicksizer tool to estimate hardware requirements
* Installation and configuration requirements for selected apps
* Related app-specific SAP Fiori design guidelines
* Shortcut to the Maintenance Planner tool to establish the technical update path
* Related app recommendations based on your usage profile

* B is correct because installation and configuration requirements for selected apps are one of the things that you can find in the SAP Fiori apps reference library. The SAP Fiori apps reference library provides information on how to install and configure each app, such as required software components, backend configuration steps, and frontend configuration steps.

* C is correct because related app-specific SAP Fiori design guidelines are one of the things that you can find in the SAP Fiori apps reference library. The SAP Fiori apps reference library provides links to the app-specific design guidelines that describe the user

interface and interaction patterns of each app, such as layout, navigation, controls, and dialogs.

* E is correct because related app recommendations based on your usage profile are one of the things that you can find in the SAP Fiori apps reference library. The SAP Fiori apps reference library provides suggestions on other apps that might be relevant or useful for you based on your role, industry, or business area.

NEW QUESTION 38

For which of the following products do you find a specific set of best practices for the public sector?
* SAP S/4HANA
* SAP SuccessFactors Employee Central
* SAP Marketing Cloud
* SAP S/4HANA Cloud, public edition

SAP S/4HANA is one of the products for which you can find a specific set of best practices for the public sector. The best practices for SAP S/4HANA for Public Sector provide guidance on how to implement and configure SAP S/4HANA to support the business processes and requirements of public sector organizations, such as budgeting, grants management, fund accounting, and tax and revenue management.

NEW QUESTION 39

When working with an Agile approach, what is the minimum planning requirement expected at the beginning of the Realize phase?
* Realize phase scope, planning, and budget should be completed and final.
* Release plan and sprint ceremony guidelines should be finalized.
* Sprint planning and sprint durations should be defined for the first 2 to 3 sprints.
* User stories on product backlog should be in ready state for the first 2 to 3 sprints.

* C is correct because in an Agile approach, the planning is done iteratively and incrementally, so the minimum requirement at the beginning of the Realize phase is to have sprint planning and sprint durations defined for the first 2 to 3 sprints. Verified References:

* : SAP Activate Project Management Certification Guide, page 117

NEW QUESTION 40

In which phase do you collect the main attributes of the product as per the Agile definition?
* Deploy
* Realize
* Explore
* Prepare

According to the SAP Activate methodology for SAP S/4HANA Cloud, the Explore phase is where you collect the main attributes of the product as per the Agile definition. The main attributes of the product are the features, requirements, and user stories that describe what the product should do and how it should deliver value to the customers and stakeholders. The Explore phase involves a fit-to-standard process, where you validate the fit of your business processes to the standard SAP solution and identify any gaps or extensions that need to be addressed. You also prioritize and refine your product backlog, which is a list of user stories that represent the work needed to achieve the product vision1.

NEW QUESTION 41

What accelerator can help you document the configuration definition in the Explore phase?
* Data definition
* Change request template
* Test strategy

* Backlog template
* D is correct because the backlog template is an accelerator that can help you document the configuration definition in the Explore phase. The backlog template is a document that contains the user stories that describe the configuration requirements and gaps for each scope item. It also includes the acceptance criteria, priority, effort estimation, and dependencies for each user story. Verified References:

* : SAP Activate Project Management Certification Guide, page 123

NEW QUESTION 42

You are transitioning to SAP S/4HANA.In which phase do you adjust custom code?
* Realize
* Explore
* Discover
* Deploy
* A is correct because in the Realize phase, you adjust custom code when transitioning to SAP S/4HANA.

Custom code is the code that was developed by the customer or a partner to extend or modify the standard SAP functionality. Custom code needs to be adjusted to ensure compatibility and performance with SAP S/4HANA, as well as compliance with the simplification items and coding guidelines.

Verified References:

* : [SAP Activate Methodology for SAP S/4HANA On Premise], page 22

NEW QUESTION 43

When performing an SAP Readiness Check in system conversion, what areas are covered within the result?Note: There are 3 correct answers to this question
* Recommended SAP Fiori apps
* SAP and third party interfaces
* Sizing for SAP S/4HANA
* Active business functions
* Simplification database
* A is correct because SAP Readiness Check in system conversion covers the area of recommended SAP Fiori apps, which are apps that are suggested by SAP based on the customer’s current usage of SAP GUI transactions.

* C is correct because SAP Readiness Check in system conversion covers the area of sizing for SAP S/4HANA, which is an estimation of the hardware and software resources required to run SAP S/4HANA based on the customer’s current system data.

* E is correct because SAP Readiness Check in system conversion covers the area of simplification database, which is a collection of simplification items that describe the changes and adaptations required for SAP S/4HANA compared to the previous SAP ERP releases. Verified References:

* : SAP Readiness Check 2.0 for SAP S/4HANA

NEW QUESTION 44

In which of the following do you use a work item in Focused Build?

* Waves
* Releases
* Sprints
* Epics
* C is correct because in Focused Build, you use a work item in sprints. A work item is a document that describes a configuration requirement or gap for a scope item. A work item is assigned to a sprint, which is a time-boxed iteration where the work item is implemented and tested by the Scrum team. Verified References:

* : Managing Work Items

NEW QUESTION 45

In which phase do you verify that the SAP Best Practices content meets the customer’s business needs, and then capture gaps?
* Deploy
* Prepare
* Explore
* Realize
* C is correct because in the Explore phase, you verify that the SAP Best Practices content meets the customer’s business needs, and then capture gaps. This is done through a fit-to-standard workshop, where you compare the customer’s business requirements with the standard SAP functionality, and document any gaps or deviations as user stories. Verified References:

* : SAP Activate Project Management Certification Guide, page 122

NEW QUESTION 46

When does the Scrum team receive formal confirmation that the user stories are completed to the satisfaction of the product owner?
* During the user acceptance test
* During the sprint retrospective
* During the daily Scrum meeting
* During the sprint review
* D is correct because the sprint review is the event where the Scrum team receives formal confirmation that the user stories are completed to the satisfaction of the product owner. The sprint review is a meeting where the Scrum team demonstrates the functionality that they have built and configured in the sprint, and the product owner provides feedback and acceptance. Verified References:

* : [What is a Sprint Review? | Scrum.org]
